SUBJECT INDEX

VOLUME 69, JANUARY-JUNE, 1970

ORIGINAL ARTICLES AND NOTES, CASES, INSTRUMENTS

Note: Abstract Index follows Author Index

A

- Accommodation and pupillary abnormalities in Vogt-Koyanagi-Harada syndrome, 582
 Accommodation mechanism, unified model for, 1063
 Acetazolamide therapy, aplastic anemia following, 684
 Adenovirus type 8 keratoconjunctivitis in United States: Epidemiologic, clinical, and microbiologic features, 473
 Adhesive, tissue, experimental scleral buckling of posterior pole using, 419
 Adrenergic blockade in humans, guanethidine-induced, pupillographic evaluation of: Experimental Horner's syndrome, 442
 Aerial image, erect, compact indirect ophthalmoscope providing, 677
 Albino animal, melanocyte and Langerhans cell population of cornea and limbus in, 669
 Alpha-chymotrypsin into posterior chamber, cannula for introducing, 1082
 Amblyopia and anisometropia in Duane's syndrome, 774
 Amblyopia, occlusion, paradoxical fixation and microstrabismus, 223
 Amyloidosis, ophthalmologic aspects of, 423
 Analogues, complexed synthetic RNA, on herpes simplex virus infection in rabbit cornea, effect of, 650
 Anemia, aplastic, following acetazolamide therapy, 684
 Aneurysm, saccular, of ophthalmic artery, 997
 Angiographic-histologic correlation of eye vessel permeability with protein-bound fluorescent dye, 27
 Angiography, fluorescein, correlation of, and retinal diastasis in diabetic retinopathy, 403
 during induced ocular hypertension in man, 39
 in Eales' disease, 271
 in retinal arterial branch obstructions, 43
 in retinitis pigmentosa, 826
 Angle-closure glaucoma, cataract formation and refractive changes after surgery for, 747
 Angle recess, anterior chamber, 1016
 Animals, natural and experimental ocular toxoplasmosis in, 662
 Aniseikonic prescriptions, combined rules of thumb in, 118
 Anisometropia and amblyopia in Duane's syndrome, 774
 Anomalies, fixation, in strabismus, etiology and pathogenesis of. 1. Eccentric fixation and anomalous retinal correspondence, 210
 Paradoxical fixation, occlusion amblyopia, and microstrabismus, 223
 Subjective localization, 228
 Roles of suppression scotoma and of motor factors, 236
 Anomalies, unusual congenital optic disk, 376
 Anterior chamber angle recess, 1016
 Antilymphocyte serum, donor pretreatment with, modification of corneal homograft rejection by, 453
 Aplastic anemia following acetazolamide therapy, 684
 Apnea, effect of hyperventilation and, on spontaneous nystagmus, 130
 Applanation, Goldmann, and Schiötz tonometry using 1948 and 1955 conversion scales, comparison of, 1007
 Applanation tonometer, MacKay-Marg electronic, in patients with scarred irregular cornea, validity of, 1003
 Aqueous dynamics, effects of exercise on, 245
 Aqueous humor of human eyes, penetration of gentamicin into, 481
 Arterial branch obstructions, retinal, fluorescein angiography in, 43
 Artery, ophthalmic, saccular aneurysm of, 997
 Astrocytoma of corpus callosum presenting with acute comitant esotropia, 594

B

- Blepharoptosis, congenital, 431
 repair by modified Fasanella-Servat operation, 850

- Zweng, H. Christian, Little, Hunter L. and Peabody, Robert R.: *Laser Photocoagulation and Retinal Angiography with Current Concepts in Retinal and Choroidal Diseases*, 1092
- Branch vein occlusion, experimental retinal, 778
- Bulbar conjunctiva associated with sickle cell disease, vascular fine structure changes in, 563

C

- Calcific emboli of retinal and ciliary arteries, 372
- Caliper, double squint book, 154
- Cannula for introducing alpha-chymotrypsin into posterior chamber, 1082
- Catalase in ocular tissue and its intracellular distribution in corneal epithelium, 147
- CATARACT and glaucoma, combined operation for, 360
- extraction and suggested surgical management, review of 40 histologically proven cases of epithelial down-growth following, 598
- extraction, silica gel, 500
- formation and refractive changes after surgery for angle-closure glaucoma, 747
- formation on DFP-treated guinea pigs, role of corneal exposure in, 858
- incidence, comparison of, in normal and glaucomatous population, 368
- postoperative, in successfully filtering glaucomatous eyes, 740
- surgery, comparison of isosorbide and glycerol for, 737
- Cephalalexin in man, intraocular penetration of, 868
- Cephalosporium and fusarium keratitis, pimarcin therapy of, 458
- Choroid circulation, normal, fluorescein studies of, 543
- malignant melanoma of, necrosis of, 91
- Choroiditis, juxtapapillary, early diagnosis and natural history of, 105
- Ciliary arteries, calcific emboli of retinal and, 372
- Ciliary body, rabbit, histopathologic changes following cryosurgery and diathermy of, 65
- Collagen, rabbit scleral, fine structure of, 414
- Colorimetric measurement of optic disk, 385
- Conjugate gaze, two tests to elicit signs of spasticity of, 589

- Conjugate-oblique prism correction, V-esotropia aided by, 133
- Conjunctiva, bulbar, associated with sickle cell disease, vascular fine structure changes in, 563
- Conjunctivitis, neonatal inclusion, late followup of patients with, 467
- Constant amplitude electroretinography for determination of retinal sensitivity in normal and abnormal subjects, 836
- Contact lenses, hydrophilic, therapeutic uses of, 252
- Contraceptives, oral, visual loss associated with, 874
- Conversion scales, 1948 and 1955, comparison of Goldmann applanation and Schiøtz tonometry using, 1007
- Copper and iron intraocular foreign bodies, vitreous analysis in eyes containing, 1053
- CORNEA and limbus in albino animal, melanocyte and Langerhans cell population of, 669
- dystrophy, congenital hereditary, histology of, 964
- epithelium, catalase in ocular tissue and its intracellular distribution in, 147
- epithelium, pure, new technique for preparing sheets of, 306
- exposure in cataract formation in DFP-treated guinea pigs, role of, 858
- homograft rejection, modification of, by donor pretreatment with antilymphocyte serum, 453
- irregular and scarred, validity of MacKay-Marg electronic applanation tonometer in patients with, 1003
- rabbit, effect of complexed synthetic RNA analogues on herpes simplex virus infection in, 650
- scarred irregular, validity of MacKay-Marg electronic applanation tonometer in patients with, 1003
- ulcer, Shigella sonnei, 873
- xenografts, experimental, survival of donor epithelium in, 448
- Corpus callosum presenting with acute comitant esotropia, astrocytoma of, 594
- CORRESPONDENCE:
- Comparison of 1948 and 1955 Schiøtz tables with applanation tonometry, 504
- Corrections, 505, 693, 890
- Irritation of rabbit eye caused by contact lens wetting solution, 503
- Corticosteroids, topical, plasma cortisol and intraocular pressure response in, 999
- Cryoextraction, sponge holder for, 685
- Cryoextractors, freezing parameters of, 1057
- new, 499
- Cryosurgery and diathermy, histopathologic changes following, of rabbit ciliary body, 65
- Cryotherapy or diathermy, survey of retinal detachment surgeons on use of, 749
- Cystoid degeneration, reticular, of peripheral retina, 392

D

- Detachments, naturally, occurring, with long-term retinal detachment in owl monkey, correlation of, 640
- Diabetes juvenile-onset, ocular effects of, 387
- Diabetic lacy vacuolation of iris pigment epithelium: Case report, 197
- histopathologic report, 201
- Diabetic retinopathy, correlation of fluorescein angiography and retinal digest in, 403
- Diathermy or cryosurgery, histopathologic changes following, of rabbit ciliary body, 65
- Diathermy or cryotherapy, survey of retinal detachment surgeons on use of, 749
- Diathermy, scleral damage, in, 754
- Diisopropyl fluorophosphate (DFP) treated guinea pigs, role of corneal exposure in cataract formation in, 858
- Diseases, infections, changing concepts concerning pathogenesis of, 947
- Disk anomaly, optic, unusual congenital, 376
- Disk, optic, colorimetric measurement of, 385
- Donor epithelium, survival of, in experimental corneal xenografts, 448
- Donor pretreatment with antilymphocyte serum, modification of corneal homograft rejection by, 453
- Downgrowth, epithelial, following cataract extraction and suggested surgical management, review of 40 histologically proven cases of, 598

- Driver with visual difficulty, guidelines for examining, 1019
 Duane's syndrome, anisometropia and amblyopia in, 774
 Dystrophy, congenital hereditary corneal, histology of, 964
 myotonic, vascular tufts at pupillary margin in, 573

E

- Eales' disease, fluorescein angiography in, 271

- angiography in retinal arterial branch obstructions, 43
 angiography in retinitis pigmentosa, 826
 studies of normal choroidal circulation, 543
 Fluorescent dye, angiographic-histologic correlation of eye vessel permeability with, 27

- Foreign bodies, copper and iron intraocular, vitreous analysis in eyes containing, 1053
 Four-dot light, combination, 1080
 Freezing parameters of cryoextractors, 1057
 Fusarium and cephalosporium keratitis, pimarinin therapy of, 458

G

- Gaze, conjugate, two tests to elicit signs of spasticity of, 539

- Gaze palsy, voluntary, optokinetic nystagmus, vestibular nystagmus, clinical physiologic correlate of, 437
 Gentamicin, penetration, of, into aqueous humor of human eyes, 481
 Gentamicin sulfate in external eye infections, 300

- Glaucoma and cataract, combined operation for, 360
 angle-closure, cataract format and refractive changes after surgery for, 747
 comparison of cataract incidence in patients with normal eyes and patients with, 368
 experimental production of, in rabbits, 1010

- Glaucomatocyclitic crisis, 370
 Glaucomatous eyes, successfully filtering, postoperative cataract in, 740
 Glycerol and isosorbide for cataract surgery, comparison of, 737

- Glycogen in normal human iris pigment epithelium, 994
 Goldmann applanation and Schiötz tonometry using 1948 and 1955 conversion scales, comparison of, 1007
 Guanethidine-induced adrenergic blockade in humans, pupillographic evaluation of: Experimental Horner's syndrome, 442

- Guinea pigs, DFP-treated, role of corneal exposure in cataract formation in, 858

H

- Head tilt in vertical muscle paresis, 440
 Heart, fatty infiltration of orbits and, 987
 Heavy particle radiation, intraocular, of experimental malignant melanoma in rabbits, 1047

- Herpes simplex virus infection in rabbit cornea, effect of complexed synthetic RNA analogues on, 659
 Histochemical structure of vitreous fibers studied by phase contrast microscopy, 763
 Holder, sponge, for cryoextraction, 685

- Holes, macular, 555
 Homograf rejection, modification of corneal, by donor pretreatment with antilymphocyte serum, 453
 Horner's syndrome, experimental: pupillographic evaluation of guanethidine-induced adrenergic blockade in humans, 442

- Hyaloid and retinal capillaries in albino rats, comparative electron microscopic study of development of, 1032
 Hydrocephalus and papilledema in Maroteaux-Lamy syndrome (mucopolysaccharidosis Type VI), 969

- Hydrophilic contact lenses, therapeutic uses of, 252
 Hyperplastic primary vitreous, posterior, 535
 Hypertension, induced ocular, in man, fluorescein angiography during, 39
 Hyperventilation and apnea, effect of, on spontaneous nystagmus, 130

I

- Illuminator, new surgical, 310
 Image, erect aerial, compact indirect ophthalmoscope providing, 677
 Immunologic ocular vasculitis, experimental acute, 1023

- Infection, experimental ocular, in rabbits, influence of vehicles on neomycin sulfate prevention of, 659
 external eye, gentamicin sulfate in, 300
 herpes simplex virus, in rabbit cornea, effect of complexed synthetic RNA analogues on, 659

- Infectious diseases, changing concepts concerning pathogenesis of, 947
 Infiltration, fatty, of orbits and heart, 987
 Inflammation, intraocular, study of, 1

- Instruments, cannula for introducing alpha-chymotrypsin into posterior chamber, 1082
 cryoextractor, freezing parameters of, 1057
 cryoextractor, new, 499
 double squint hook caliper, 154
 light, combination four-dot, 1080

INSTRUMENTS (continued)

- new surgical illuminator, 310
ophthalmoscope, compact indirect, providing erect aerial image, 677
sponge holder for cryoextraction, 685
telescopic loupe, adjustable head-mounted, with fiber optics, 498
Intracapsular lens extraction through a small incision, 277
Intraocular foreign bodies, copper and iron, vitreous analysis in eyes containing, 1063
heavy particle radiation of experimental malignant melanoma in rabbits, 1047
inflammation, study of: Clinical entities in "uveitis," 1
penetration of cephalixin in man, 868
pressure response to topical corticosteroids, plasma cortisol and, 999
pressure, seasonal variation in, 608
Iris pigment epithelium, diabetic lacy vacuolation of: case report, 197
histopathologic report, 201
Iris pigment epithelium, normal human, glycogen in, 994
Iron and copper intraocular foreign bodies, vitreous analysis in eyes containing, 1053
Ischemic optic neuropathy, histopathology of, 78
Isosorbide and glycerol for cataract surgery, comparison of, 737

J

- Juvenile-onset diabetes, ocular effects of, 387
Juxtapapillary chorioiditis, early diagnosis and natural history of, 105

K

- Keratitis, cephalosporium and fusarium, pimaricin therapy of, 458
fusarium and cephalosporium, pimaricin therapy of, 458
mycotic, potassium iodide in, 126
Keratoconjunctivitis, adenovirus type 8, in United States: epidemiologic clinical and microbiologic features, 473

L

- Lacy vacuolation, diabetic, of iris pigment epithelium: case report, 197
histopathologic report, 201
Langerhans cell population of cornea and limbus in albino animal, melanocyte and, 669
Lens capsule, anterior, spontaneous rupture of, 264
Lens extraction, intracapsular, through a small incision, 277
Leukomas, nontraumatic, 860
Light, combination four-dot, 1080
Limbus and cornea in albino animal, melanocyte and Langerhans cell population of, 669
Localization, subjective, 228

M

- MacKay-Marg electronic applanation tonometer in patients with scarred irregular cornea, validity of, 1003
Macula holes, 555
Maroteaux-Lamy syndrome (mucopolysaccharidosis Type VI), hydrocephalus and papilledema in, 969
Massage, ocular, reduction of vitreous weight by, 603
Mechanism, accommodative, unified model for, 1063
MEETINGS, CONFERENCES, SYMPOSIA
AMA Section in Ophthalmology, 832
Bascom Palmer Eye Institute, 156
Israel Ophthalmological Society, 877
New England Ophthalmological Society, 313, 689, 877

OBITUARIES

- Eugene Maurice Blake, 693
Frederick Allison Davis, 889
Occlusion amblyopia, paradoxical fixation and microstrabismus, 223
Occlusion, experimental retinal branch vein, 778
Ocular effects of juvenile-onset diabetes, 387
Ocular hypertension, induced, in man, fluorescein angiography during, 39
Ocular infection, experimental, in rabbits, influence of vehicles on neomycin sulfate prevention of, 659
Ocular massage, reduction of vitreous weight by, 603
Ocular muscles, oblique, fundamental principle of action of, 623
Ocular tissue, catalase in, and its intracellular distribution in corneal epithelium, 147
Ocular toxoplasmosis in animals, natural and experimental, 662
Ocular vasculitis, experimental acute immunologic, 1023
Operation, combined, for glaucoma and cataract, 360
Operation, modified Fasanella-Servat, blepharoptosis repair by, 850
Ophthalmic artery, saccular aneurysm of, 997
Ophthalmic patients, rapid eye movement (REM) sleep in, 615
Ophthalmic surgery, mortality in association with, 610
Ophthalmologic studies on mesoridazine, 143
Ophthalmoscope, compact indirect, providing erect aerial image, 677
Optic disk anomaly, unusual congenital, 376
disk colorimetric measurement of, 385
neuritis, nematode, 72
neuropathy, ischemic, histopathology of, 78
Oral contraceptives, visual loss associated with, 874
Orbit and heart, fatty infiltration of, 987
Orbit, localized xanthomatosis of, 1080
Orbit metastases from extra-adrenal pheochromocytoma, 638
Orbit scanning in proptosis, extension of head for, 284

P

- Palsy, voluntary gaze, optokinetic nystagmus, vestibular nystagmus, clinical physiologic correlate of, 437

- Papilledema and hydrocephalus in Maroteaux-Lamy syndrome (mucopolysaccharidosis Type VI), 969
- Paresis, vertical muscle, head tilt in, 440
- Peripapillary vascular network, origin of, 249
- Phacoanaphylactic endophthalmitis, 264
- Phase contrast microscopy, histochemical structure of vitreous fibers studied by, 763
- Pheochromocytoma, extra-adrenal, orbital metastases from, 638

Syndrome (continued)

- experimental (continued)
 guanethidine-induced adrenergic blockade in humans, 442
 Morning glory: unusual congenital optic disk anomaly, 376
 glucopolysaccharidosis Type VI, Maroteaux-Lamy, hydrocephalus and papilledema in, 969
 vitreomacular traction, confirmed histologically, 975
 Vogt-Koyanagi-Harada, pupillary and accommodative abnormalities in, 582
 Synthetic RNA analogues, complexed, on herpes simplex virus infection in rabbit cornea, effect of, 650

T

- Telescopic loupe, adjustable head-mounted, with fiber optics, 498
 Tests, two, to elicit signs of spasticity of conjugate gaze, 589
 Thompson, William (1833-1907): military surgeon, pioneer photomicrographer, clinical ophthalmologist, 487
 Tissue adhesive, experimental scleral buckling of posterior pole using, 419
 Tonometer, MacKay-Marg electronic applanation, in patients with scarred irregular cornea, validity of, 1003
 Tonometry, Schiøtz, using 1948 and 1955 conversion scales, comparison of Goldmann applanation and, 1007
 Traction syndrome, vitreomacular, confirmed histologically, 975
 Toxoplasmosis in animals, natural and experimental ocular, 662
 Trachoma in eastern United States, 681
 Trachoma stage IV, noninfectivity of, 436
 Tufts, vascular, at pupillary margin in myotonic dystrophy, 573
 Tumors, metastatic, of eyelids, 259

U

- Uveitis, clinical entities in: Study of intraocular inflammation, 1
 Ulcer, *Shigella sonnei* corneal, 873

V

- Vascular fine structure changes in bulbar conjunctiva associated with sickle cell disease, 563
 Vascular network, peripapillary, origin of, 248
 Vascular tufts at pupillary margin in myotonic dystrophy, 573
 Vasculitis, experimental acute immunologic ocular, 1023
 Vehicles on neomycin sulfate prevention of experimental ocular infection in rabbits, influence of, 659
 Vein occlusion, experimental retinal branch, 778
 V-esotropia aided by conjugate-oblique prism correction: case report, 133
 Virus infection, herpes simplex, in rabbit cornea, effect of complexed synthetic RNA analogues on, 650
 Visual difficulty, guidelines for examining driver with, 1019
 Visual loss associated with oral contraceptives, 874
 Vitreomacular traction syndrome confirmed histologically, 975
 Vitreous analysis in eyes containing copper and iron intraocular foreign bodies, 1053
 Vitreous fibers studied by phase contrast microscopy, histochemical structure of, 736
 Vitreous, posterior hyperplastic primary, 535
 Vitreous weight by ocular massage, reduction of, 603
 Vogt-Koyanagi-Harada syndrome, pupillary and accommodative abnormalities in, 582

W

- Wet tissues, study of, by means of replicas, 111

X

- Xanthomatosis, localized, of orbit, 1080
 Xenografts, experimental corneal, survival of donor epithelium in, 448

ABSTRACT INDEX

VOLUME 69, JANUARY-JUNE, 1970

A

- Aberration, monochromatic, of human eye, 906
- Ablation, visual cortex, acetylcholine in rabbit visual system nuclei after enucleation and, 900
- Abnormalities, multiple congenital, associated with cryptophthalmia, 898
- Abscess, lenticular, advantage of cryoextraction in, 718
- Absorption, mannitol, and metabolism in man, 908
- of vitamin B₁₂ in tobacco amblyopia, 912, 913
- Accident as cause for development of retinal detachments, 88
- Accommodation amplitude recording, new precise method of, 518
- Accommodation, disturbances of, in treatment with tuberculostatics, 1103
- morphological basis for new theory of (architecture and function of human zonula), 895
- relative range of, determination of near correction from, 1101
- Aceclidin in glaucoma, clinical experimental investigation of, 715
- Acetylcholine in rabbit visual system nuclei after enucleation and visual cortex ablation, 900
- A-chymotrypsin glaucoma, experimental, 923
- Acid-base balance equilibrium following administration of ascorbic acid to rabbits, alterations in, 898
- Acid composition, fatty, of retina, effect of alloxan diabetes on, 1099
- mucopolysaccharides (AMPS) of rabbit cornea after long-term fixations in various fixation fluids, dissolution or retention of, 915
- mucopolysaccharides in urine, quantitative determination of, 517
- mucopolysaccharides in exophthalmos, increased urinary excretion of, 942
- sialic, in aqueous humor and vitreous of normal human eyes and of eyes with malignant melanoma of choroid, 1099
- Acini of human lacrimal gland (orbital part), mucosubstances of, 329
- of human lacrimal gland, ultrastructure of, 511
- ACTH-secreting pituitary adenomas; Cushing's syndrome and pituitary tumors, 327
- Adamantiadis-Behcet-Syndrome, 174
- Adaptation, prism, interocular effects in, 519
- Adenocarcinoma, sebaceous, of meibomian gland, 937
- Adenoma, ACTH-secreting pituitary: Cushing's syndrome and pituitary tumors, 327
- oxyphil, cell, of lacrimal caruncle, 192
- Adenosine triphosphoric acid in eye tissues following its local introduction, experimental study in changes in level of, 171
- Adenosine triphosphate (ATP) content of retina in relation to blood circulation, 902
- Adenovirus, house epidemic by, 903
- infection of eye with 5-iodo-2'-deoxyuridine, treatment of, 904
- type 3 infection, ocular, comparison of methods for laboratory diagnosis of, 1101
- Adhesives in corneal surgery, 527
- Adipose tissue, intraocular, and persistent hyperplastic primary vitreous, 925
- Administration, passive, of humoral antibodies, sensitized polymorphonuclear leukocytes and immunologically competent lymphocytes in rabbits supporting transparent interlamellar chicken corneal grafts, effects of, 1100
- Adnexa, ocular, chronic herpes simplex infection of, 902
- Adrenaline eyedrops in therapy of glaucoma, 183
- on mitotic activity of lens epithelium, effect of, 907
- Adrenergic denervation of eye in unilateral cervical sympathectomy, 930
- retinal neurons of some mammals, morphological and pharmacohistochemical characteristics of, 1096
- Aerobic glycolysis in ox cornea, 173
- After-image examination, direct, with pleoptophor, angle of anomaly and Bangerter's method of, 178
- transfoveal, as indicator of eccentric localization, 1108
- Agarose gel electrophoresis of proteins from bovine corneal epithelium, 1098
- Age, changes of lipoids in human cornea with, 919
- electron microscopy studies of structure of outer wall of Schlemm's canal with special consideration of outflow channels and changes due to, 716
- groups, various, comparative gonioscopic and tonographic investigations of, 1115
- of patient, limbic distance of straight horizontal muscles in relation to angle of strabismus, to refraction and to, 707
- patients under 40 years of, retinopathy at diagnosis of diabetes with special reference to, 725
- Agenesis, familial, of cerebellar vermis; syndrome of episodic hyperpnea, abnormal eye movements, ataxia and retardation, 515
- Agglutinating antibodies, 180
- Aging, using PAM staining technique, electron microscopic study of human iris vessels with special reference to vascular changes on, 715
- Agnosia, right-sided unilateral visual spatial, asomatognosia and with left hemisphere lesions, 727
- visual form, 190
- Agriculture, ocular hazards in, 1126
- Air embolism, arterial, fundus oculi in, 927
- experimental, 724
- Air-vent for eye surgery, 524
- Albinism, ocular, and Xg, 895
- universal complete, with nystagmus, chromosome study in, 168
- Alcohol poisoning, methyl, 911
- Alkali burns, corneal, 918
- corneal, prevention of ulcers of, 919
- corneal, role of tissue buffer-capacity in, 711
- Allergic uveitis, experimental, in guinea pig by immunization with homologous retina, 517
- Alloxan diabetes on fatty acid composition of retina, effect of, 1099
- Alpha-crystallin, chick lens, subunit composition of, 173
- Alpha-methylstyrol, changes in retina and its vessels under influence of, 520
- Amaurosis fugax, benign, of uncertain cause, 1119
- AMBLYOPIA and blind, social and intellectual promotion of, 335
- and strabismic eye, effect of direct occlusion on manner of fixation of, 705
- ex anopsia, neural mechanisms concerned in development of, 1107
- ex anopsia, selective suppression of cerebral evoked potentials to patterned light in, 705
- functional, physiopathology of, 704
- pupillary responses in rivalry and, 917
- strabismic, arrestovisography in, 917
- strabismic, under direct-view ophthalmoscopy, visually evoked occipitogram in, 525
- subject, contribution to study of peripheral visual acuity in normal and, 1108
- suppression, by conventional patching, intensive hospital pleoptics and intermittent office pleoptics, comparison of management of, 1105
- suppression, by intensive pleoptics versus conventional patching, results of biostatistical study of management of, 1105
- therapy: methods and results, 1106
- tobacco, absorption of vitamin B₁₂ in, 912, 913
- using Herman's grills, indirect determination of dimension of retinal receptor fields of, 1109
- with eccentric fixation, relation between site of fixation, difference in refraction and angle of squint in, 706
- with strabismus, color vision testing in, 918

- Amelanotic melanoblastoma 3 Fortner in golden hamster, radiotherapy of intraocular melanoblastomas in biological model of, 940
- Amines, sympathomimetic, in human eye, interactions of local guanethidine and, 913
- in patients treated with L-dopa, mydriatic responses to, 912
- Amino acids in aqueous humor and vitreous body of single eyes, determination of, 899
- radioactive, taken up into outer segments of frog (*Rana pipiens*) rods, localization of, 171
- Aminoaciduria and keratosis follicularis, oculocerebral syndrome with, 895
- Amiodarone chlorhydrate (Cordarone), corneal lesions in course of treatment with, 1112
- Amphibian lens development from non-lens ectoderm, influenced by mercaptoethanol, induction and competence in morphogenesis and, 898
- Amphibian species, study of soluble lens proteins from different, 167
- Amyloidosis of cornea, 180
- Anemias, megaloblastic, retinopathy in, 332
- ANESTHESIA, common local, retrobulbar block for oculocardiac reflex and duration of protection by, 1102
- general, and infusion therapy, ocular damage from increases in intraocular tension during, 185
- intraocular pressure and gross outflow facility in cat eye during, 182
- retrobulbar, a case of sudden death after, 175
- retrobulbar, electrocardiographic changes following, 702
- unilateral corneal, in oculoauriculovertebral dysplasia, 897
- ANEURYSM, giant, of internal carotid artery presenting with visual changes, 190
- induced oculomotor palsy, effects of carotid ligation on, 933
- infantile cerebral, with ophthalmoplegia and quadriplegia, 328
- intraclinaloid carotid, causing ophthalmoplegia, 190
- intracranial, significance of so-called J-shaped sella in diagnosis of, 931
- miliary, Leber's retinal degeneration with, 513
- saccular, of internal carotid artery, ocular symptoms in, 1119
- ANGIOGRAPHY, fluorescein, as source of artifact in investigation of hypertension, 916
- diagnosis of pseudopapillitis, 725
- in embolism or thrombosis of retinal vessels, 188
- in ocular biometrics stereophotogrammetry of, 1104
- in pigment dystrophy of retina, 1118
- new observations in, 1118
- of hereditary retinal degenerations, 724
- fluorescence, of iris in diabetics and non-diabetics, 528
- of iris vessels after occlusion of central retinal vein, 721
- postoperative, in retinal detachment, 189
- of vertebral artery, transitory blindness after, 930
- Angiomatosis retinae, cryotherapy of, 929
- Angle-closure, cumulative, 1113
- Angle, infiltration, comparison of aqueous outflow through upper and lower one-half of, 924
- Angle of anomaly and Bangerter's method of direct after-image examination with pleoptophor, 178
- Angulocision, new surgical technique, 183
- Animals, laboratory, ophthalmodynamographic examinations of, 894
- Anomalies, excitation-inhibition, of extraocular muscles through electrographic observations, 526
- ophthalmic artery, 511
- Anomalous retinal correspondence in strabismus and small angle deviations, 177
- Anophthalmos, two cases of, 897
- Anophthalmos, unilateral postoperative, dynamograms of "empty" orbit and dynamographic investigations in patients with, 727
- Anoxia, experimental, on animals on electro-retinogram and electro-oculogram, 173
- Anterior chamber, epithelialization of, 716
- reconstructive surgery in, 335
- traumatic cysts of, and their treatment, 181
- Anterior limiting membrane of vitreous in aphakic eye, pseudoexfoliative deposits on, 1117
- Anterior segment, experiences with x-ray therapy for inflammatory ocular disease of, 702
- Anterior segment of eye, drug toxicity for, 910
- in cryotherapy of cornea, temperature of, 702
- methodical and physiological aspects of statistical evaluation of metabolite levels in various compartments of, 899
- Antibiotics to cornea, experimental study on intralaminar application of, 911
- ANTIBODIES, agglutinating, 180
- and interferon, vesicular stomatitis virus (VSV) infection in rabbit eye and role of, 1101
- complement fixing, serum antibodies after keratoplasty and, 902
- formation by single cells during experimental immunogenic uveitis, 517
- humoral, sensitized polymorphonuclear leukocytes and immunologically competent lymphocytes in rabbits supporting transparent interlamellar chicken corneal grafts, effects of passive administration of, 1100
- insulin-binding, immunological study on diabetic retinopathy with special reference to, 943
- serum, after keratoplasty, 180
- serum, after keratoplasty and complement fixing antibodies, 902
- technique, fluorescent, leukocyte-binding serum-globulin in patients with ocular diseases and studies with, 942
- Antigenic mosaic of vitreous and its surrounding tissues; experimental study, 323
- Antiglaucoma fistulizing operations, importance of conjunctival cleavage in juxtasclear subtenons plane in course of, 715
- Antiglaucomatous treatment and of Scheie's operation, results of preoperative, 718
- Antilymphocytic serum, homologous, on rabbit corneal heterografts, 517
- treatment of sympathetic ophthalmia with, 714
- Antistreptolysin and antistreptolysinase tests (AST and ASH) in endogenous uveitis, 713
- Aorta of rabbit, lipid changes in eye concomitant with atherosclerosis in, 331
- APHAKIA detachment, extraction of Soemmering's ring before retinal surgery in, 724
- eye, pseudoexfoliative deposits on anterior limiting membrane of vitreous in, 1117
- in infants and young children, contact lenses in, 520
- prognosis of retinal detachment in, 724
- retinal detachment in, 1118
- spectacles, modified type of preliminary, 174
- Aphakic and operated glaucoma cases, scleral rigidity in, 185
- Appendicitis, parasitic, from *Taenia saginata*, uveitis of undetermined etiology and, 713
- Applanation disparity, Schiøtz, following retinal detachment surgery, 183
- tonometers in rabbits, indentation and, 922
- tonometers, recent procedures for calibrating indentation and, 703
- Applicator, *Sr, complications following eye treatment with, 335
- AQUEOUS flow and entry of cycloleucine into aqueous humor of vervet monkeys, 715
- flow and entry of cycloleucine into aqueous humor of vervet monkeys, influence of intraocular pressure and some drugs on, 715
- flow, past-tonography re-establishment of ocular pressure and, 1115
- humor, alterations in, following calcium chloride administration in rabbits, 181
- and serum of rabbits following chlorpromazine, changes of intraocular pressure and chloride, sodium and potassium concentrations in, 908
- and vitreous body of single eyes, determination of amino acids in, 899
- and vitreous of normal human eyes and of eyes with malignant melanoma of choroid, sialic acid in, 1099
- erythromycin in, 910
- formation rate and outflow facility, effect of corticosteroids on, 1116

AQUEOUS (continued)

- humor (continued)
 in vivo, protein content of normal human, 516
 of vervet monkeys, aqueous flow and entry of cycloleucine into, 715
 of vervet monkeys, influence of intraocular pressure and some drugs on aqueous flow and entry of cycloleucine into, 715
 with ascorbic acid administration in rabbits, alterations in, 1114
 outflow, can pigmentary deposits on trabecular meshwork increase resistance of? 529
 through upper and lower one-half of infiltration angle, comparison of, 924
 Arc, perilimbal degenerative of cornea, 179
 Arch syndrome, first and second, ocular abnormalities with, 514
 Area centralis of cat retina, high-intensity effects on slow potentials and ganglion cell activity in, 171
 Area centralis of cat retina, intraretinal b-wave and d.c. component in, 171
 Argyll Robertson's time, knowledge of pupillary reactions in, 1129
 Argyrophilic discontinuous layers in human Descemet's membrane, 919
 Arrestovisography in strabismic amblyopia, 917
 Arterial air embolism, fundus oculi in, 527
 Arterial supply of human optic chiasm, 727
 Arteriole, superior macular, in 24-year-old female, bilateral optic neuritis and occlusion of, 908
 Arteriopathy in uveitis, clinical features and pathogenesis of discontinuous reversible, 714
 Arteritis, temporal, miosis, trismus and dysphagia and unusual presentation of, 932
 Artery anomalies, ophthalmic, 511
 Artery, common carotid, ocular and hemodynamic findings in unilateral occlusion of, 932
 dolicho-ectatic intracranial, 1120
 external carotid, on ophthalmodynamographic curve, influence of, 933
 internal carotid, ocular symptoms in saccular aneurysms of, 1119
 occlusion, bilateral central retinal, in homocystinuria, 897
 retinal, and indirect trauma, 724
 temporal, in ophthalmology, importance of, 1123
 Artifact in investigation of hypertension, fluorescein angiography as source of, 916
 Artificial lens implants (pseudophakoi) in children, post-traumatic, 924
 Ascorbic acid administration in rabbits, alterations in aqueous humor with, 114
 Ascorbic acid, pressure lowering effect of, in ocular hypertension, 529
 Ascorbic acid to rabbits, alterations in acid-base balance equilibrium following administration of, 898
 Asomatognosia and with left hemisphere lesions, right-sided unilateral visual spatial agnosia, 727
 Aspergillosis of orbit, 935
 Aspiration, lens, using side-opening needle, 975
 Associative and perceptual disorders of visual recognition; relationship to side of cerebral lesion, 326
 Astigmatism, cross cylinder scan test for, 1102
 Ataxia, retinitis pigmentosa and diabetes mellitus, hereditary muscular atrophy with, 897
 Athanasias grille, extraction of intravitreal foreign bodies after radiographical localization with, 522
 Atherosclerosis in aorta of rabbit, lipid changes in eye concomitant with, 331
 Atmosphere, visual perception beyond, 1125
 Atoms, tagged, effect of ultrasound on permeability of eye tissues with, 172
 Atrophy, hereditary muscular, with ataxia, retinitis pigmentosa and diabetes mellitus, 897
 pigmented paravenous, of retina and choroid, 189
 Attachment to three-mirror contact lens with indentator of variable length, 913
 Attenuation of ultrasound in muscular and fat tissue, 521
 Autism, decreased postrotatory nystagmus in early infantile, 326
 Autochemotherapy, subconjunctival, treatment of chemical ocular burns, 907

Auto-ophthalmoscopy with orthoscope, 701

- Autopsy-vitreous, vitreous replacement by, 323
 Autoradiography using ¹²⁵I-labeled insulin, and application of histochemical procedures, immunohistological studies on human diabetic and nondiabetic eyes and, 1124
 Aviators, naval, study of flash blindness effects using, 1126
 Axial length of eye on size of recorded b-potential in clinical single-flash electroretinogram, influence of, 701
 Azathioprine in active chronic iridocyclitis, 910

B

- Basal cells of corneal epithelium in man and monkey, 1111
 Bacteria in various areas of eye, concomitance of, 904
 BACTERIAL decontamination of polymethyl methacrylate in ophthalmology, 1100
 eye infections, treatment of, 905
 flora of conjunctiva and eyelid margin, 904
 hypersensitivity, paraenchymatous keratitis from, 708
 sensitization, experimental study of interstitial keratitis provoked by, 903
 Bangerter's method of direct after-image examination with pleotrophor, angle of anomaly and, 173
 Barkan, Tailor, and de Vincentiis, goniotomies according to, 182
 Basement membrane of human cornea in recurrent epithelial erosion syndrome, 527
 Basset Hound, glaucoma in, 184
 Behçet's disease, ocular symptoms in diagnosis of, 331
 Behçet's syndrome with phenformin and ethyloestrenol, treatment of, 520
 Besnier-Boeck-Schaumann, new observation of pseudotumor of orbit caused by, 934
 Best's disease, vitelliform disc and precocious macular heredodegeneration, 514
 Bicarbonate reabsorption, oculocerebrorenal syndrome in child with normal urinary acidification and defect in, 515
 Binocular disparity, kinetic and static function of, 1109
 Binocular functions, clinical investigations of lability of, 1098
 Binocular indirect ophthalmoscope, miniature, 914
 Binocular single vision, diplopia field and area of, 1108
 Binocular vision, new anatomic physiologic and psychologic factors of, 515
 Biometrics, ocular, stereophotogrammetry of fluorescein angiographs in, 1104
 Biomicroscopy of vitreous and its role in pathogenesis of retinal detachment, 719
 slit lamp, of ora serrata and pars plana, 714
 of ora serrata and pars plana corporis ciliaris, 936, 929
 of ora serrata and pars plana corporis ciliaris. VI, VII, VIII, 926-927
 of ora serrata and pars plana of ciliary body, 714
 Biostatistical study of management of alternating esotropia with and without orthoptics, results of, 1105
 Biostatistical study of management of suppression amblyopia by intensive pleoptics versus conventional patching, results of, 1105
 Birefringence of mucous fibrils in mucous thread of inferior conjunctival fornix, 526
 Bivalent-vegetative therapy of glaucoma, 184
 Blaskovics ptosis procedure as described in his clinical reports, development as, 1122
 Bleb after fistulating operations for glaucoma, coverage of leaking filtering, 717
 Blepharitis, Demodex as cause of, 1122
 Blepharophimosis and acquired somatofacial dysmorphism, 897
 congenital, ocular function and motility in, 525
 Blepharoplasty in Z manner, 1122
 Blind and amblyopes, social and intellectual promotion of, 335
 Blind, combined mobility system for, 522
 BLINDNESS, central, modes of reaction to, 1119
 congenital night, electrophysiological and psychophysical study of two forms of, 174
 effects, flash, using naval aviators, study of, 1126

BLINDNESS (continued)

- night, problem of, 902
transient, 726
transient monocular, through collateral pathways, 328
transitory, after angiography of vertebral artery, 930
Blistering or intraosseous meningioma, ossifying fibroma of orbital roof and its distinction from, 934
Blood aqueous barrier to MMH, effects of monomethylhydrazine (MMH) upon cornea and studies on, 908
circulation, ATP (adenosine triphosphate) content of retina in relation to, 902
clotting agents available in tissues and humors of eye, 172
cysts, orbital, origin of, 935
disease, retinal abnormalities in, 330
flow changes of ciliary body following cyclocryotherapy in rabbits, 1114
in Schlemm's canal in glaucoma suspects, 717
loss, recurrent, optic neuropathy of, 725
supply of optic nerve and optic papilla, 895
vessels, embryonic, and to "vitreous cortex cells," structure of zonula in relation to, 925
vessels, embryonic, and vitreous cortex cells, structures of vitreous body in relation to, 720
vessels in rubeosis iridis diabetica, electron microscopic study on small, 714
vessels, intraocular, critical closure of, 1099
volume, ocular, 1099
Body pressure, pretecal syndrome in monkeys and disturbances of gaze and, 727
Bone lamella, episcleral, 1109
Bovine corneal epithelium, agarose gel electrophoresis of proteins from, 1098
Bovine retina, protein synthesis and incorporation of L-leucine- 3 H- 3 OOH into, 1098
Bowen's disease, ocular manifestation of, 193
Bowman's membrane, net-like degeneration of, 712
Reis-Bücklers' corneal dystrophy and role of, 1110
B-potential in clinical single-flash electroretinogram, influence of axial length of eye on size of recorded, 701
Brain injured monkey, visual evoked responses in, 327
Branchial arch, first, syndrome of the: oculo-auriculo-vertebral dysplasia, 169
Brightness, differential, of stimuli and estimation of brightness, 172
Bronchogenic carcinoma, rapid loss of vision, which is initial manifestation of, 941
Buccal mucous membrane grafts, treatment of intractable vernal catarrh with, 179
Bulb, ocular pulse in rabbits at experimental carotid occlusion and at loading of, 515
Burns, chemical ocular, with combined subconjunctival autohemotherapy, treatment of, 907
chemical, of eye due to pesticides, 1126
corneal alkali, 918
prevention of ulcers of, 919
role of tissue buffer-capacity in, 711
Butylsympatol, phenylephrine, pilocarpine, and lithium on-runout of 86 Rb from isolated rabbit ciliary processes, effects of, 907
B-wave, intraretinal, and d.c. component in area centralis of cat retina, 171
- C**
- Caffeine containing tablets and Coca-Cola on ocular tension in normal and glaucomatous subjects with normal intraocular tension, effect of, 185
Calcareous degeneration, primary, of cornea, 178
Calicificent epithelioma, Malherbe's clinical and histological diagnosis of, 939
Calcification, experimental corneal, in animals treated with dihydrotachysterol, 1110
metastatic, of cornea and conjunctiva in chronic renal insufficiency, 710
Calcium chloride administration in rabbits, alterations in aqueous humor following, 181
Caloric stimulations, differential, in vestibular diagnosis, 328
Canaliculi, supernumerary puncta and, 329
Canine iris, fine structure of, 894
Canthoplasty, medial, 937
Carbon dioxide laser radiation, corneal injury produced by, 920
Carcinoma and related lesions of ocular conjunctiva and cornea, cytologic diagnosis of, 711
bronchogenic, rapid loss of vision, which is initial manifestation of, 941
metastatic, to choroid with choroidal detachment, 939
Cardiogenic glaucoma, contribution to problem of, 718
Cardiovascular effects of oral propylene glycol, 912
CAROTID aneurysm, infraclinoid, causing ophthalmoplegia, 190
artery, common, ocular and hemodynamic findings in unilateral occlusion of, 932
external, on ophthalmodynamographic curve, influence of, 933
internal, ocular symptoms in saccular aneurysms of, 1119
internal, presenting with visual changes, giant aneurysm of, 190
cavernous fistulae, hypoxic ocular sequelae of, 191
ligation on aneurysm-induced oculomotor palsy, effects of, 933
occlusion and at loading of bulb, ocular pulse in rabbits at experimental, 515
occlusion in rabbit, ocular volume and common, 516
transient ischemic episode, thermography following, 1120
Cartilage grafts, conchal, in augmentation rhinoplasty and orbital floor fracture, 1121
Cart, new compact, for retina surgery, 523
Caruncle, lacrimal, bilateral capillary cystadenomas of, 937
oxyphil cell adenoma of, 192
CAT, effect of suxamethonium on extraocular muscles and on intraocular pressure in, 910
eye during anesthesia, intraocular pressure and gross outflow facility in, 182
lacrimal gland of, morphological and histochemical studies on, 894
localization and characteristics of cortical waves associated with eye movement in, 900
ocular toxoplasmosis in, 904
retina area centralis of, high-intensity effects on slow potentials and ganglion cell activity in, 171
intraorbital b-wave and d.c. component in area centralis of, 171
structure of, after occlusion of retinal circulation, 167
Catapresan (2-[2,6-dichlorophenylamino] 2-imidazoline-hydrochloride)—new tension-lowering drug, 184
CATARACT and abnormal proliferation of lens epithelium in mice carrying the cat^{tr} gene, 186
and glaucoma and comparison of different procedures, simultaneous operations for, 1117
and glaucoma, combined surgery for, 1116
and glaucoma operation, combined, 530
aspiration-irrigation with twin needle, 524
associated with metabolic disorders in infancy, 718
cause, complications and result in loop extractions of, 720
complicated and senile, silicone extraction of, 926
congenital, and surgical aspects, 718
congenital, and virological aspects, 718
cryoextraction, modified instruments for, 176
dermatogenous, 531
experimental chlorpromazine, 719
extraction after fastulizing operations, 926
follow-up study of cystoid macular edema following, 720
intracapsular, by cryotechnique and other methods, 531
limbal wound healing after, 926
on changes in chamber angle, effect of wound closure after, 185
peripheral corneal edema after, 527
reposition of Descemet's membrane after, 720
formation and systemic cortico-steroid therapy in nephrotic children, 531
chronic simple glaucoma and, 521

CATARACT (continued)

- Fraser gene, cataracts and abnormal proliferation of lens epithelium in mice with, 186
galactose; changes in protein distribution during development, 187
glaucoma, mitotic therapy and, 907
Chronic simple glaucoma and cataract formation, 521
Studies on lens in glaucoma after discontinuance of echthiophate (Pospholine Iodide) therapy; 1002
Experimental studies on guinea pig eye, 1102
in chondrodystrophia calcificans connata, 170
in ophthalmological practice, 185
induced in high-glucose medium, biochemical evaluation of, 516
juvenile, linear extraction of, 186
liquefaction in light of modern autoallergic, enzymatic and neuro-endocrinological investigations, pathomechanism of, 1116
method of iris retraction in cryoextraction of, 925
microsurgery of, 324
posterior subcapsular, 186
posterior subcapsular, and glaucoma with long-term oral corticosteroid therapy, 913
problem of retinal visual acuity in cases of, 185
rat lenses, biophysical studies on normal and, 719
senile and complicated, silicoextraction of, 926
senile, preference of right eye for, 926
sunflower, in Wilson's disease, 332
surgery, congenital, slit lamp surgical microscope in keratoplasty and, 524
evaluation of various vasoconstrictors in, 718
in myopic eyes, experience with, 924
new suture for, 522
polyvinyl pyrrolidone (PVP), 721
x-ray, distribution of protein within lenses with, 187
uncinata internuclearis anterior, 720
Catarh, intractable vernal, with buccal membrane grafts, treatment of, 179
Cavernous sinus venography, new method of orbital and, 703
Cell contacts in corneal epithelium, functional significance of, 710
horizontal, of mammal retina, 895
Cellular elements of vitreous, 926
Cellular proliferation, cicatrization and pigmentation after photocoagulation. (Experiments in rabbits), 721
Cellular proliferation on vitreous surface after photocoagulation, 926
Cephalalgia and eye, 190
Cephalixin in rabbit, ocular penetration of, 913
Cephalosporins in ophthalmology, 907
Cerebellar stimulation and lesions, ocular reaction in man from deep, 189
Cerebral cortex of humans, topographic distribution of optical evoked potentials on, 170
Cerebral evoked potentials to patterned light in amblyopia ex anopsia, selective suppression of, 705
Cerebral lesion, perceptual and associative disorders of visual recognition and relationship to side of, 326
Cerebrovascular studies in chronic simple glaucoma, 923
Cervical nystagmus and related disorders, 726
Cervical sympathectomy, unilateral, adrenergic denervation of eye in, 930
Cervico-oculo-acusticus syndrome with pseudopapilledema, 512
Chamber angle, effect of wound closure after cataract extraction on changes in, 185
Chamber angle of guinea pig eye, innervation of, 167
Chemical burns of eye due to pesticides, 1126
Chemical ocular burns with combined subconjunctival autohemotherapy, treatment of, 907
Chemical protection from irradiation in rabbits eye after application of cobalt-60 gamma rays, 175
CHICK corneal grafts, transparent interlamellar, effects of passive administration of humoral antibodies, sensitized polymorphonuclear leukocytes and immunologically competent lymphocytes in rabbits supporting, 1100
embryo by sodium pentothal, morphogenetic changes in, 514

CHICK (continued)

- lens α -crystallin, subunit composition of, 173
lens, metabolism of, during first twelve months. Attempt at biological interpretation of factor analysis, 899
CHILDREN, absence of lenticular changes from cholinesterase inhibitors in 205 eyes of, 531
acute endocrine ophthalmopathy in 12-year-old boy with long-acting thyroid stimulator, 330
and youths, puncture of lens capsule as method of treatment in congenital lens subluxation in, 619
babies and young children, development of vision, hearing, and communication in, 519
dacryocystorhinostomy in, 328
exact vision test for, 703
five-year-old child, optic atrophy following herpes zoster ophthalmicus in, 928
four-year-old boy, bilateral idiopathic retinoschisis in, 928
infantile autism, decreased postrotatory nystagmus in early, 326
infantile cerebral aneurysm with ophthalmoplegia and quadriparesis, 328
infants and childhood, secondary glaucoma in, 1113
infants and young children, contact lenses in aphakia in, 520
infants, cataracts associated with metabolic disorders in, 718
glaucomatous disk in, 717
unusual complications of acute maxillary osteomyelitis in, 935
late infantile amaurotic idiocy with multilamellar cystosomes; electron microscopic study, 512
nephrotic, cataract formation and systemic corticosteroid therapy in, 531
newborn, fundus oculi of, 325
herpes simplex virus infection, ocular involvement in, 904
refraction in, 518
retinal photography in, 524
simultaneous fixation from divergent anatomic eye position of, 525
vitreous hemorrhage in, 323
oculocerebrorenal syndrome in child with normal urinary acidification and defect in bicarbonate reabsorption, 515
post-traumatic artificial lens implants (pseudophakoi) in, 924
Rodenstock R 5 visual test device for, 905
secondary school pupils in Amsterdam, incidence of known and unknown color vision defects and study of 6526, 1097
siblings, hydrophthalmos in, 930
squinting, development and intelligence of, 706
indications for early operations of, 706
uveitis in, 528
visually handicapped, 930
with poor vision, ERG and VER studies of, 702
with strabismus, new principles in treatment of one-half to three-year-olds, 706
young and ophthalmologist's role, reading disabilities in, 1119
young, vision of, 906
Chloramphenicol, lesions of optic nerve by, 911
Chloride, sodium and potassium concentrations in aqueous humor and serum of rabbits following chlorpromazine, changes of intraocular pressure and, 908
Chlorpromazine cataracts, experimental, 719
changes of intraocular pressure and chloride, sodium and potassium concentrations in aqueous humor and serum of rabbits following, 908
therapy, optic atrophy during, 174
Cholesterol ester deficiency, corneal opacity in familial plasma, 527
Cholesterol feeding on lipid content of rabbit cornea, effect of long-term, 919
Cholinesterase activity of regenerating cornea after electrocautery of epithelium, histochemical investigations on, 712
Cholinesterase inhibitors in 205 eyes of children, absence of lenticular changes from, 531

- Chondrodystrophia calcificans connata, cataract in, 170
 Chorea, Sydenham's, central retinal-artery occlusion in, 725
 Chorionic epithelial tumor of uterus, solitary choroidal metastasis as only clinical manifestation of, 939
 Chorioretinal microcirculatory changes, early cryosurgical, 928
 Chorioretinal, sodium-fluorescein and, 522
 Chorio-retinopathy, central, in subacute, sclerosing leucoencephalitis (van Bogaert), 330, 331
 CHOROID and retinal disease, changes of resting potential in, 189
 benign melanoma of, 1113
 detachment, metastatic carcinoma to choroid with, 939
 from primary melanoma of skin, metastatic malignant melanoma of ciliary body and, 940
 malignant melanoma of, light microscopic findings in ocular nervous system of, 193
 malignant melanoma of, sialic acid in aqueous humor and vitreous of normal human eyes and of eyes with, 1099
 malignant melanoma of, unusual presentation of, 1123
 melanoma, microscopic (light and electron) observations pertaining to invasion of blood vessels by, 192
 metastasis, solitary, as only clinical manifestation of chorionic epithelial tumor of uterus, 939
 pigmented paravenous atrophy of retina and, 189
 retina, and vitreous, rabbit, following retrobulbar injection, penetration of steroids into, 912
 with choroid detachment, metastatic carcinoma to, 939
 Choroiditis, multifocal inner, 529
 Chromophore transfer in photolysis of visual pigments, lipid to protein, 900
 Chromosome studies in patients with retinoblastoma, 939
 Chromosome study in universal complete albinism with nystagmus, 168
 Cicatricial stage, retrolental fibroplasia in, 927
 Cicatrization and pigmentation after photocoagulation in rabbit experiments, cellular proliferation, 721
 CILIARY BODY and choroid from primary melanoma of skin, metastatic malignant melanoma of, 940
 following cyclocryotherapy in rabbits, blood flow changes of, 1114
 (Fuchs' benign epithelioma), benign papillary tumor of non-pigmented epithelium of, 180
 in adult, juvenile xanthogranuloma of, 940
 microsurgery of iris and, 529
 rabbit, irradiated with x-rays in comparison with results obtained with fast neutrons, electron microscopic study of, 901
 slitlamp biomicroscopy of ora serrata and pars plana of, 714, 929
 slit lamp biomicroscopy of ora serrata and pars plana of, 926
 Ciliary responses, isolated rabbit, effects of phenylephrine, butylsympatol, pilocarpin, and lithium on runoff of ⁸⁶Rb from, 907
 Ciliospinal response in man, 932
 Ciliun inversum, 191
 Circulatory changes associated with onset of primary retinal detachment, 724
 Cleft, incomplete naso-ocular, 1121
 Clefting, facial, hypertelorism, microtia and, 514
 Clinic and practice, dazzling test in, 916
 Clinic, eye, computer in, 915
 Clofibrate in chronic simple glaucoma, 716
 in treatment of diabetic retinopathy, double-blind controlled trial of, 521
 on open-angle glaucoma, effect of, 923
 Closure, critical, of intraocular blood vessels, 1099
 Coagulator, Siemens ruby laser, photocoagulation through Goldmann contact glass and second model of attachment to Zeiss-Oberkochen photocoagulator of, 1105
 Coats' disease, 1118
 Coats' of eye on ultrasound field, influence of, 702
 Cobalt-60 application, treatment of retinoblastomas with, 330
 Cobalt-60 gamma rays, chemical protection from irradiation in rabbits eye after application of, 175
 CO₂ laser irradiation, ocular injury from, 335
 Cold injury to corneal epithelium, 526
 Collagen in corneal immune injury, damage to, 903
 Collagenase in corneal ulcerations, 919
 Collateral pathways, transient monocular blindness through, 328
 Collodion skin, ocular manifestations of, 1123
 Coloboma, macular, and skeletal abnormality, 896
 of eyelid and harelip, 529
 of optic nerve head, 896
 Colobomatous orbito-palpebral cysts: clinical, anatomical, pathological, and genetic study, 169
 Color defects, occupational possibilities of, 335
 Color distinction induced by Kukan's ophthalmodynamometer, disturbance of, 898
 Color vision defects, study of 6526 secondary school pupils in Amsterdam and incidence of known and unknown, 1097
 COLOR VISION, psychological aspects of, 902
 testing in amblyopia with strabismus, 918
 Communication, vision and hearing in babies and young children, development of, 519
 Compensated lenses in ocular motility, use of, 1106
 Computer evaluation on tonography, 183
 Computer in eye clinic, 915
 Conchal cartilage grafts in augmentation rhinoplasty and orbital floor fracture, 1121
 Concomitance of bacteria in various areas of eye, 904
 Conduction system, fastest, in visual pathway of rabbit, 896
 Cone and early receptor potential in rhesus monkey, 515
 Cone and rod activity in electroretinogram evoked by double flashes of light, 902
 Cone dominance of human early receptor potential, 516
 Conjugate and disjunctive eye movements, cue for, 917
 CONJUNCTIVA and cornea, ocular, cytologic diagnosis of carcinoma and related lesions of, 708
 and corneal changes in dysproteinemia, 708
 and eyelid margin, bacterial flora of, 904
 cleavage in juxtalescleral sub-tenon's plane in course of antiglaucoma fistulizing operations, importance of, 715
 cytology, 701
 defects, employment of homologous conjunctival tissue for covering of, 711
 epithelial cysts in, 526
 flap, implantation of keratoprosthesis using full thickness onlay sclera and sliding (prosthetic sclerokeratoplasty), 713
 fornix, inferior, birefringence of mucous fibrils in mucous thread of, 526
 in chronic renal insufficiency, metastatic calcification of cornea and, 710
 lymphangiectasia haemorrhagica, 709
 lymphatic anchoring filaments, ultrastructure of, 168
 lymphoma, ultrastructural study of, 712
 mucous flow in, 528
 neoplasms masquerading as chronic conjunctivitis or keratitis, observations on, 712
 rabbit, immune suppression studies with 6-mercaptopurine and homotransplantation of, 903
 spreader, disposable, 522
 tarsal, keratinization of, 180
 tissue for covering of conjunctival defects, employment of homologous, 711
 vessels-analysis of vascular pathology with PAM impregnation technique, electron microscopic study of, 920
 Conjunctivitis, ligneous, 711, 919
 Newcastle, case of, 921
 or keratitis, observations on conjunctival neoplasms masquerading as chronic, 712
 Connective tissues, eye and congenital metabolic disturbances of, 330
 Contact glass, Goldmann, and second model of attachment to Zeiss-Oberkochen photocoagulator and some improvements of Siemens ruby laser coagulator, photocoagulation through, 1105
 CONTACT LENSES, corneal and haptic, 1101
 decompression sickness and, 527
 flush-fitting scleral, 518
 following corneal grafts, 711
 in aphakia in infants and young children, 520

CONTACT LENSES (*continued*)

- on pseudomonas ulcers in rabbit corneas, effect of, 903
- replacement of corneal epithelium with, 527
- three-mirror, with indentator of variable length, attachment of, 913
- use of, 1102
- Continuous-wave lasers, photocoagulation delivery systems for, 703
- Contraceptives, oral, and their side effects and ophthalmological manifestations, 911
- Contrast response of human visual mechanisms sensitive to orientation and direction of motion, 172
- Contusion injuries, deformation of globe under high-speed impact and relation to, 333
- Contusion of eye, treatment of, 334
- Convergence insufficiency, review of treatment of, 1107
- Convergence spasm associated with Wernicke's encephalopathy, 326
- Copper and iron and their protein transport in human lacrimal fluid, study of, 899
- Cordarone (amiodarone chlorhydrate), corneal lesions in course of treatment with, 1112
- CORNEA, alkali burns, 918
 - alkali burns, prevention of ulcers of, 919
 - role of tissue buffer-capacity in, 711
 - amyloidosis of, 180
 - and conjunctiva in chronic renal insufficiency, metabolic calcification of, 710
 - and conjunctival changes in dysproteinemia, 708
 - and haptic contact lenses, 1101
 - and sclera, 711
 - and sclera following cryotherapy, viscosity of rabbit, 709
 - and studies of blood-aqueous barrier to MMH, effects of monomethyl-hydrazine (MMH) upon, 908
 - anesthesia, unilateral, in oculoauriculo-vertebral dysplasia, 897
 - button, refraction of transplanted, 712
 - calcification in animals treated with dihydrotachysterol, experimental, 1110
 - cylindrical protrusion and thinning of lower half of, 709
 - cytologic diagnosis of carcinoma and related lesions of ocular conjunctiva and, 711
 - donor material, human, 918
 - dystrophy, cloudy central, of François; five cases in same family, 178
 - congenital endothelial, 1096
 - familial, features of clinical course of, 527
 - Reis-Bücklers', and role of Bowman's membrane, 1110
 - edema by application of human non-swelling corneas, prevention and treatment of, 1111
 - edema of animals, new measuring device compares clearing effect of osmotic substances in, 710
 - edema, peripheral, after cataract extraction, 527
 - endothelium and Descemet's membrane, electron microscopic observations of early development of human, 168
 - and evidence for membrane on its surface, supravital staining of, 921
 - observations on posterior membrane of, 178
 - sugar transport across, 173
 - to temperature reversal effect, relationship of supravital staining of, 920
 - epithelium, bovine, agarose gel electrophoresis of proteins from, 1098
 - cold injury to, 526
 - functional significance of cell contacts in, 710
 - histochemical investigations on cholinesterase activity of regenerating cornea after electrocautery of, 712
 - in man and monkey, basal cells of, 1111
 - occurrence, characteristics and distribution of so-called polygonal cells in, 919
 - with contact lens, replacement of, 527
 - experimental study on intralaminar application of antibiotics to, 911
 - fibroblast, phagocytic capability of, 526
 - film and permanent discontinuity and dellen, desiccation of, 1112
 - grafts, contact lenses following, 711

CORNEA (*continued*)

- grafts (*continued*)
 - corneal thickness and postoperative changes in refrigerated and cryopreserved, 918
 - transparent interlamellar chicken, effects of passive administration of humoral antibodies, sensitized polymorphonuclear leukocytes and immunologically competent lymphocytes in rabbits supporting, 1100
 - herpetic diseases of, and their treatment, 710
 - heterografts, rabbit, homologous an lymphocytic serum on, 517
 - heterotransplants, survival of, 178
 - human non-swelling, prevention and treatment of corneal edema by application of, 1111
 - human, with age, changes in lipoids in, 919
 - immune injury, damage to collagen in, 903
 - infections, intracameral injections of framycetin sulphate (Soframycin) in fulminating; clinical trial, 175
 - injury produced by carbon dioxide laser radiation, 920
 - in recurrent epithelial erosion syndrome, basement membrane of human, 527
 - layers of rabbit and its alteration by storage, respiratory metabolism of, 180
 - lesions in course of treatment with Cordarone (amiodarone chlorhydrate), 1112
 - lesions in myotonic dystrophy, 1110
 - lesion, unusual, 712
 - limbus, human, ultrastructure of Langerhans cell in, 920
 - macular dystrophy, histochemistry of, 1110
 - opacities, hyaline, in case of Bieger's anomaly, 897
 - opacity in familial plasma cholesterol ester deficiency, 527
 - ox, aerobic glycolysis in, 173
 - pathology in disseminated lupus erythematosus, 1111
 - perilimbal debenerative arc of, 179
 - peripheral ring opacity of, 710
 - primary calcareous degeneration of, 178
 - rabbit, after long-term fixations in various fixation fluids, dissolution or retention of acid mucopolysaccharides of, 915
 - effect of contact lenses on pseudomonas ulcers in, 903
 - effect of long-term cholesterol feeding on lipid content of, 919
 - glucose and oxygen utilization by, 172
 - immunoglobulin G in, 902
 - refraction, effect of subconjunctivally injected hyaluronidase on, 921
 - regenerating, after electrocautery of epithelium, histochemical investigations on cholinesterase activity of, 712
 - stromal nerves, nucleoside phosphatase staining of, 1096
 - stroma, transparency of, 172
 - surgery, adhesives in, 527
 - temperature of anterior eye segment in cryotherapy of, 702
 - tenuity with Ehlers-Danlos syndrome, 526
 - thickness as diagnostic test, keratoconus and spatial variation of, 918
 - postoperative changes in refrigerated and cryopreserved corneal grafts, 918
 - thinning syndrome: keratoepithelysis, 710
 - tissue in necrotizing nodular scleritis, transplantation of, 710
 - transplant, early replacement of, in failure of keratoplasty, 179
 - experimental investigation of postoperative tensile strength of, 920
 - ulcerations, collagenase in, 919
 - vascularization, experimental investigations on effect of lacrimal fluid of rabbits and humans on development, 920
 - verticillata, 1112
 - wetting time, desiccation of precorneal film and, 1112
 - wound healing, influence of topical and oral zinc upon, 919
- Corneabrasion unit, simplified, 522
- Corneo-scleral grafts, penetrating, in two cases of malignant tumor of limbus, 179

- Correction, near, from relative range of accommodation, determination of, 1101
- Cortex ablation, visual, acetylcholine in rabbit visual system nuclei after enucleation and, 900
- Cortex cells, vitreous, structures of vitreous body in relation to embryonal blood vessels and, 720
- Cortex cells, vitreous, structure of zonula in relation to embryonic blood vessels and to, 925
- Cortex, human visual, following excitation of peripheral retinal rods, responses of, 900
- Cortex, ipital and temporal, on visual behavior of monkeys, effects of radical disconnection of, 727
- Cortical waves associated with eye movement in cat, localization and characteristics of, 900
- CORTICOSTEROID administration, subconjunctival, increased intraocular pressure following, 717
- does glaucoma occur as a sequel of systemic application of? 183
- on aqueous humor formation rate and outflow facility, effect of, 1116
- systemic and topical, ocular effects of, 521
- therapy in nephrotic children, cataract formation and systemic, 531
- therapy, long-term oral, posterior subcapsular cataracts and glaucoma with, 913
- ocular complications of, 907
- Corticotrophin, treatment of retrolubar neuritis with, 328
- Cosaldon in treatment of vascular disturbances in ophthalmological practice, experiences with, 911
- Cotton-wool spots in diabetic retinopathy, 723
- Counterrolling, ocular, effect of drugs on, 910
- Cripple, presbyopic, 520
- Critical closure of intraocular blood vessels, 1099
- Critical fusion frequency with Tubingen perimeter, measurement of, 701
- Cross cylinder scan test for astigmatism, 1102
- Cryocoagulation, experimental trans-scleral, at variable temperatures, 1104
- CRYOEXTRACTION, 1117
- cataract, modified instruments for, 176
- in lenticular abscess, advantage of, 718
- iris retraction by suture during, 925
- of cataracts, method of iris retraction in, 925
- Cryoextractor at various temperatures, experimental study on behavior of, 702
- Cryofixation with vitreous excision, 925
- Cryoglobulinemia, essential, 188
- Cryopexy, measurement of temperature in retina during, 722
- Cryopreserved corneal grafts, corneal thickness and post-operative changes in refrigerated and, 918
- Cryoprobe, inexpensive easily constructed, 701
- Cryosurgery chorioretinal microcirculatory changes, early, 928
- in treatment of retinal detachment, 723
- Cryotechnique and other methods, intracapsular cataract extraction by, 531
- CRYOTHERAPY in herpes simplex keratitis, results from, 710
- in herpetic keratitis, 179
- of angiomatosis retinae, 929
- of cornea, temperature of anterior eye segment in, 702
- of herpetic keratitis, 1112
- viscosity of rabbit sclera and cornea following, 709
- Cryotherapy and electrocoagulation, experimental investigation of degree of shrinking of sclera in, 920
- Cryptophthalmia, multiple congenital abnormalities associated with, 898
- Cultured lens epithelium, characteristics of, 719
- Cultures, new epithelial cell, and measurement of oxygen uptake per cell, 901
- preoperative, in ophthalmology, 518
- Culture system, iris organ, viral growth patterns in, 1101
- Cup/disk ratio, 922
- Curve, excess, of refraction of human eye and its causes, 519
- Cushing's syndrome and pituitary tumors; pathophysiology and ocular manifestations of ACTH-secreting pituitary adenomas, 327

dystrophy, dystrophia myotonica and, 326
emboli, source of, 726
fatty acid composition, effect of alloxan diabetes on, 1099
focal illumination, human electroretinogram and occipital potential in response to, 1099
functions in Niemann-Pick lipidosis, 515
homologous, experimental allergic uveitis in guinea pig by immunization with, 517
human, at time of iris development, development movements of, 513
some structural features of fovea centralis in, 895
why is there fovea in? 898
in dogs, effect of section of optic nerve on histological differentiation and electrical activity on, 722
in relation to blood circulation, ATP (adenosine triphosphate) content of, 902
normal, horizontal cell of, 895
microaneurysms, 929
neurons, adrenergic, of some mammals, morphological and pharmacohistochemical characteristics of, 1096
oligodendroglioma of, 938
peripapillary, microcirculation of, 895
peripheral, in myopia with particular reference to retinal breaks, 725
meridional folds and meridional complexes of, 324
phakomatosis, atypical case of, 188
photography in newborn, 524
photography using panchromatic and orthochromatic films, 914
photoreceptors, spectral sensitivity of, responsible for conduction of pupillary light reflex in human, 704
reattachment in owl monkey, ERG of retinal detachment and, 725
receptor fields of amblyope using Herman's grills, indirect determination of dimension of, 1109
rivalry, quantitative test for, 1105
rods, peripheral, responses of human visual cortex following excitation of, 900
screening pigment migration in frog, spectral sensitivity of, 170
stimuli, localized, and visual evoked response in man, relation between, 1100
surgery, causes of failure in, 723
in aphakic detachment, extraction of Soemmering's ring before, 724
new compact cart for, 523
toxic without detachment, 723
toxic action of hemoglobin on vitreous and, 323
vascular changes in untreated retinoblastoma, 939

RETINA (continued)

- vein, central fluorescein angiography of iris vessels after occlusion of, 721
in thrombosis with peripheral venous thrombosis and thrombocytopenia, 721
venous system and optic nerve, side effects of ovulation inhibitors on, 909
vertebrate, atypical mitochondria in ellipsoid of photoreceptor cells of, 168
vessels, caliber and tone of, effects of application of physiotherapeutic procedures on, 172
fluorescein angiography in embolism or thrombosis of, 188
visual acuity in cataract cases, 185
RETINAL CORRESPONDENCE, anomalous, 177
Retinaldehyde by visual pigment of dark-adapted rats, uptake of tritiated, 900
RETINAL DETACHMENT, 1118

in aphakia, prognosis of, 724
indirect trauma as cause of, 188
postoperative fluorescein angiography in, 189
primary, circulatory changes associated with onset of, 724
retinocochleitis and, 189
silicon injection into vitreous in hopeless cases of, 325
surgery, Schiötz-applanation disparity following, 183
scleral depressor and electrode in, 523
with retinal breaks, vital staining of, 928
RETINAL PIGMENT dystrophy, fluorescein angiography in, 1118
epithelium, 927
reticular dystrophy of, 928
Retinitis, central serous, 1118
pigmentosa and diabetes mellitus, hereditary muscular atrophy with ataxia, 897
pigmentosa, central, electroretinogram in, 928
RETINOBLASTOMA and uveal melanoma, erroneous clinical diagnoses of, 330
bilateral, spontaneous regression of, 329
chromosome studies in patients with, 939
facial changes to radiation in cases of, 934
osteogenic sarcoma following radiotherapy for, 940
photoreceptor elements in, 940
radiation therapy in, 938
untreated, metinal vascular changes in, 939
with Co application, treatment of, 330
RETINOPATHY at diagnosis of diabetes, with special reference to patients under 40 years of age, 725
central serous, contribution to physiopathology and treatment of, 1117
diabetic, cotton-wool spots in, 723
double-blind controlled trial of clofibrate in treatment of, 521
photocoagulation and local steroid-induced ocular hypertension in treatment of, 325
use of conjugated estrogens in, 1102
with special reference to insulin-binding antibody, immunological study on, 943

in mild diabetes of long duration, 929
pericentral pigmentary, 168
phenothiazine, 1103
proliferative diabetic, photocoagulation in, 325
sequela to preretinal hemorrhage in, 1117
solar, visual prognosis after, 1118
stellar, of Leber, 723
Retinocochleitis, bilateral idiopathic, in 4-year-old boy, 928
familial idiopathic sex-linked juvenile, 896

- Retraction, dyathyroid upper lid, unwanted pharmacological effects of local guanethidine in treatment of, 909
 iris, by suture during cryoextraction, 925
 iris, in cryoextraction of cataracts, method of, 925
 syndrome of Duane with myasthenia gravis, 1124
 Retractor, modified Schepens fork, 523
 Retrobulbar anesthesia, a case of sudden death after, 175
 Retrobulbar anesthesia, electrocardiographic changes following, 702
 Retrobulbar block for oculocardiac reflex: Dilation of protection by common local anesthetics, 1102
 Retrobulbar injection, penetration of steroids into rabbit's vitreous, choroid, and retina following, 912
 Retrobulbar neuritis with corticotrophin, treatment of, 328
 Retrocorneal membrane, 178
 Retrolental fibroplasia in cicatricial stage, 927
 Retrolental fibroplasia, pathogenesis of, 512
 Rhabdomysarcoma of orbit, intracranial extension of non-striated embryonal, 192
 Rhesus monkey, cones and early receptor potential in, 515
 Rheumatoid arthritis, juvenile, iridocyclitis in, 713
 Rheumatoid episcleral nodules, histopathology of, 925
 Rhinoplasty, augmentation, and orbital floor fracture, conchal cartilage grafts in, 1121
 Rhinostomy after extirpation of lacrimal sac, 1122
 Rieger's anomaly, hyaline corneal opacities in case of, 897
 Rieger's syndrome, 1098
 Rigidity, ocular, measurement of, 1113
 Ring opacity, peripheral, of cornea, 710
 Rivalry and amblyopia, pupillary responses in, 917
 Rivalry, retinal, quantitative test for, 1105
 Rodenstock R 5 visual test device for children, 905
 Rods and cone activity in electroretinogram evoked by double flashes of light, 902
 frog (*Rana pipiens*), localization of radioactive amino acid taken up into outer segments of, 171
 peripheral retinal, responses of human visual cortex following excitation of, 900
 sling, elastic, to elevate paralyzed lower lid, 1121
 Rubeosis iridis diabetica, electron microscopic study on small blood vessels in, 714
 Rubinstein-Taybi syndrome, a case of, 513
- S**
- Saccular aneurysms of internal carotid artery, ocular symptoms in, 1119
 Sarcoidosis, 934
 Sarcoma, osteogenic, following radiotherapy, 940
 Sato fixation needle, improved, 523
 Scanning, radioactive, in exophthalmos, 935
 Scan test, cross cylinder, for astigmatism, 1102
 Scheie's operation, results of preoperative antiglaucomat-Scheie's operation (continued)
 ous treatment and of, 718, 1115
 Schepens fork retractor, modified, 523
 Schlemm's canal in glaucoma suspects, blood in, 717
 Schlemm's canal with special consideration of outflow channels and changes due to age, electron microscopic studies of structure of outer wall of, 716
 SCLERA and cornea, 711
 and cornea following cryotherapy, viscosity of rabbit, 709
 and sliding conjunctival flap, implantation of keratoprosthesis using full thickness onlay (prosthetic-sclerokeratoplasty), 713
 cauterization, peripheral iridectomy with 717
 contact lenses, flush-fitting, 518
 depressor and electrode for retinal detachment surgery, 523
 depressor, new, 523
 localization of intraocular foreign bodies on operating table by coordination with, 522
 patch, human bank, 935
 recession and transcutaneous myectomy of inferior oblique muscle, comparison of, 706
 resections, new knife for, 914
 rigidity in aphakic and operated glaucoma cases, 185
 shrinking of, in electrocoagulation and in cryotherapy, experimental investigation of degree of, 920
 trephining, Elliot's, 1115
- SCLERA (continued)
 tucking procedure in retinal detachment, histological changes after, 928
 Sclerectomy, lamellar, modified Scheie and operation with, 1115
 Scleritis, necrotizing, clinical features and pathogenesis of, 179, 710
 posterior pseudo-tumors, 712
 Sclerocornea, bilateral peripheral, 1111
 Scleroderma and Sjögren's syndrome, 331
 eye lesions in, 333
 Sclerosis, progressive systemic, ophthalmic manifestations of, 942
 Screening examination of children with Rodenstock R-5 visual test device, 905
 Sebaceous adenocarcinoma of meibomian gland, 937
 Seesaw movement, congenital, 932
 Seesaw nystagmus with bitemporal hemianopia following head trauma, 933
 Sella, so-called J-shaped, in diagnosis of intracranial aneurysm, significance of, 931
 Sensitization, bacterial, 903
 Sensory threshold values, difference between electroretinographic and, 1098
 Septic endophthalmitis, metastatic, 517
 Sequela, hypoxic ocular, of carotid-cavernous fistulas, 191
 Serum antibodies after keratoplasty. Agglutinating antibodies, 180
 complement fixing antibodies, 902
 Serum globulin in patients with ocular diseases, studies with fluorescent antibody technique and leukocyte-binding, 942
 Serum of rabbits following chlorpromazine, changes of intraocular pressure and chloride, sodium and potassium concentrations in aqueous humor and, 908
 Sex-linked juvenile retinoschisis, familial idiopathic, 896
 Sialic acid in aqueous humor and vitreous of normal human eyes and of eyes with malignant melanoma of choroid, 1099
 Silicone strap, intracorneal migration of, 927
 Silicoextraction of senile and complicated cataracts, 926
 Silicon injection into vitreous in hopeless cases of retinal detachment, 325
 Siliconized dacron implants in septal and orbital surgery, 934
 Simian virus 40, neoplastic transformation in vitro of hamster lens epithelium by, 323
 Sinus, paranasal, ocular complications of infection in, 936
 Sinus venography, new method of orbital and cavernous, 703
 6-mercaptopurine, homotransplantation of rabbit conjunctiva and immune suppression studies with, 903
 Sjögren's syndrome, scleroderma and, 331
 with physalamin, treatment of, 938
 Skeletal abnormality, macular coloboma and, 896
 Skin, collodion, ocular manifestations of, 1123
 primary melanoma of, metastatic malignant melanoma of ciliary body and choroid from, 940
 Skull, base of, causing isolated oculomotor nerve paralysis with case report emphasizing microsurgical techniques, osteochondroma of, 726
 Slitlamp biomicroscopy, 522, 524, 714, 926
 Sneezing reflex, palpebral, 192
 Socket, contracted, reconstruction of, 935
 Sodium, chloride and potassium concentrations in aqueous humor and serum of rabbits following chlorpromazine, changes of intraocular pressure and, 908
 Soemmering's ring before retinal surgery in aphakic detachment, extraction of, 724
 Soframycin (framycetin sulphate), intracameral injections of, in fulminating corneal infections; clinical trial, 175
 Solar radiation, ultraviolet and, 1125
 Solar retinopathy, visual prognosis after, 1118
 Solitary neurofibroma of iris, 528
 Somatofacial dysmorphism, acquired, blepharophimosis and, 897
 Spatial variation of corneal thickness as diagnostic test for keratoconus, 918
 Spectacle lens error, rare, 906
 Spectacle lens, method for adjustment of, 174

Spectacle lens (*continued*)

- phototropic, in traffic, 333
- pinhole, modified type of, 176
- Spectacle, preliminary aphakic, modified type of, 174
- Spectral sensitivity of retinal photoreceptors responsible for conduction of pupillary light reflex in human, 704
- Spectral sensitivity of retinal screening pigment migration in frog, 170
- Spectral visual sensitivity with electro-retinographic results in dog, concept of, 901
- Speculum, eyelid, for fixation of everted upper lid, 914
- Spinal cord, papilledema with tumors of, 327
- Spinal miosis with remarks on action of light on pupil, four cases of, 1120
- Spiral forms in eye, implications of, 1101
- SQUINT, angle of, after prolonged prismatic correction of squint, pre- and postoperative changes of, 1108
- angle of, in amblyopia with eccentric fixation, relation between site of fixation, difference in refraction and, 706
- incisions—controlled series, 1107
- small angle, 705
- small angle, by use of prisms, treatment of, 524
- surgery, late revisions in, 1109
- "Y" type operations in, 177
- Squinting children, development and intelligence of, 706
- indications for early operations of, 706
- Strabismus-90 applicator, complications following eye treatment with, 335
- Staining nucleoside phosphatase, of corneal stromal nerves, 1096
- supravital, of corneal endothelium and evidence for membrane on its surface, 921
- supravital, of corneal endothelium to temperature reversal effect, relationship of, 920
- technique, PAM, electron microscopic study of human iris vessels with special reference to vascular changes in aging, using, 715
- Static and kinetic function of binocular disparity, 1109
- Stellar retinopathy of Leber, 723
- Stereophotogrammetry of fluorescein angiographs in ocular biometrics, 1104
- Stereoscopic microscope for vitreo-retinal surgery, 703
- Stereoscopic 35 mm transparencies, multistereoviewer for, 1104
- Stereoscopic vision in motor vehicle drivers, 334
- Stereoscopic vision testing, review of, 1107
- Steroid-induced, local, ocular hypertension in treatment of diabetic retinopathy, photocoagulation and, 325
- Steroids into rabbit's vitreous, choroid, and retina following retrobulbar injection, penetration of, 912
- Stilling-Turk-Duane syndrome, etiology of, 704
- Stimuli, localized retinal, and visual evoked response in man, relation between, 1100
- Stitcher, new scleral single-stable, 176
- Storage, respiratory metabolism of corneal layers of rabbit and its alteration by, 180
- STRABISMUS, 1107
- amblyopia, arrestovisography in, 917
- and amblyopic eye, effect of direct occlusion on manner of fixation of, 705
- and small angle deviations, anomalous retinal correspondence in, 177
- color vision testing in amblyopia with, 918
- comitant, early operation in, 706
- convergent, simple differential diagnosis and aimed treatment of, 1108
- genuine convergent alternating, development and diagnosis of, 178
- new principles in treatment of one-half to three-year-old children with, 706
- paralytic, some considerations on, 1108
- patients treated with alternate occlusion, phenomenon of deviation symptom and secondary false localization in, 704
- secondary divergent, behavior of retinal correspondence in, 177
- to refraction, and to age of patient, limbic distance of straight horizontal muscles in relation to angle of, 707
- treatment, modern, first account of, 1107
- vertical, vertical transportation of horizontal rectus

STRABISMUS (*continued*)

- vertical (*continued*)
- muscles for elimination of, 1109
- with radio frequency, clinical investigations of muscular stimulation in, 705
- Stroma, corneal, transparency of, 172
- iris, associated with glaucoma, familial hypoplasia of, 896
- nerves, cornea, nucleoside phosphatase staining of, 1096
- Sturge-Weber syndrome, 932
- Subarachnoid cataracts, posterior, and glaucoma with long-term oral corticosteroid therapy, 913
- Subconjunctival administration, radioactive depotcorticosteroid penetration into monkey ocular tissue and, 913
- Subconjunctival autohemotherapy, treatment of chemical ulcer burns with combined, 907
- Subconjunctival corticosteroid administration, increased intraocular pressure following, 717
- Subconjunctival cysticercosis, 518
- Subconjunctival hemorrhages, Mercurochrome and, 907
- Subconjunctival injected hyaluronidase on corneal refraction, effect of, 921
- Subpigment epithelial hematoma, disciform macular degeneration with, 927
- Suction ophthalmodynamometry, 523
- Sugar transport across corneal endothelium, 173
- Sulfanilamides, staged, in eye tissues, distribution of, 520

- Suprascellar lenses, difficulties in pneumographic demonstration of, 1119
- Supravital staining of corneal endothelium and evidence for membrane on its surface, 921
- Supravital staining of corneal endothelium to temperature reversal effect, relationship of, 920
- Surface tension of tears, measurement of, 1099
- SURGERY, cataract, evaluation of various vasoconstrictors in, 718
- cataract, in myopic eyes, experience with, 924
- new suture for, 522
- polyvinyl pyrrolidone (PVP) in, 721
- combined, for glaucoma and cataracts, 1116
- congenital cataract, 524, 718
- cornea, adhesives in, 527
- difficulties of vitreous, and indications for intravitreal injections, 322
- glaucoma, 717, 922, 1113, 1115
- inferior oblique muscles in V pattern exotropia, 917
- interventions, symmetrical weakening, at internal rectus muscles, indication and dosage in, 1109
- ophthalmic, orbital osteomata within domain of, 1121
- stored fascia lata for, 916
- orbital and septal, siliconized dacron implants in, 934
- plastic, for pigmented hairy nevus of eyelids, 937
- preparation, combination between principles of action in, 176
- reconstructive, in anterior chamber, 335
- rectus muscles, modification of limbal approach to, 1107
- retinal, causes of failure in, 723
- detachment, Schiötz-applanation disparity following, 183
- detachment, scleral depressor and electrode in, 523
- in aphakic detachment, extraction of Soemmering's ring before, 724
- new compact cart for, 523
- septal and orbital, siliconized dacron implants in, 934
- squint, late revisions in, 1109
- vitreo-retinal, stereoscopic microscope for, 703
- vitreous, biology and, 531
- lyophilized vitreous and hyaluronic acid for, 323
- Surgical correction of ptosis, 192
- Surgical microscope, miniature head-mounted, 915
- Surgical technique, new, angulocision, 183
- orbital blowout fracture and rationale of, 934
- Surgical tray mats, eye, 523
- Surgical treatment of ocular paralyses secondary to fractures of orbit, 708

Surgical treatment (*continued*)

- of optic nerve tumors, 326
of xerosis, 717
Suture during cryoextraction, iris retraction by, 925
Suxamethonium on extraocular muscles and in intraocular pressure in cats, effect of, 910
Sympathectomy, unilateral cervical, adrenergic denervation of eye in, 930
Sympathetic ophthalmia with antilymphocyte serum, treatment of, 714
Sympathomimetic amines in human eye, 913
Syndenham's chorea, central retinal-artery occlusion in, 725
SYNDROME, Adamantiadis-Behçet, 174
Behçet's, with phenformin and ethyloestrenol, treatment of, 520
bilateral superior oblique tendon sheath, 706
carvico-oculo-acustions, with pseudopapilledema, 512
corneal thinning, 710
Cushing's, and pituitary tumors; pathophysiology and ocular manifestations of ACTH-secreting pituitary adenomas, 327
pre- and postoperative ophthalmodynamometric findings in, 190
Duane's, and familial perceptive deafness, 896
Duane's retraction, with myasthenia gravis, 1124
Ehlers-Danlos, tenuity of cornea with, 526
episodic hyperpnea, abnormal eye movements, ataxia and retardation; familial agenesis of cerebellar vermis, 515
epithelial erosion, recurrent, basement membrane of human cornea in, 527
etiology of Stilling-Turk-Duane, 704
exfoliation, development of, 324
first and second arch, ocular abnormalities associated with, 514
first branchial arch: oculo-auriculo-vertebral dysplasia, 169
Franceschetti-Goldenhar (oculo-auricular dysplasia), 169

Tetracycline in rabbit eye, distribution of tritiated, 907
Thalassemia in patients with intraocular hemorrhages, high incidence of, 941
Thermography following carotid transient ischemic episode, 1120
Thinning of lower half of cornea, cylindrical protrusion and, 709
Thiotepa, topically administered, depigmentation of eyelids after, 1103
Threshold values, sensory, difference between electroretinographic and, 1098
Thrombocythemia, migrating emboli of retinal arteries in, 723
Thrombocytopenia, retinal vein thrombosis with peripheral venous thrombosis and, 721
Thrombolytic treatment of acute vascular occlusions in ophthalmology, 175
Thrombosis or embolism of retinal vessels, fluorescein angiography in, 188
Thrombosis, peripheral venous, and thrombocytopenia, retinal vein thrombosis with, 721
retinal vein, with peripheral venous thrombosis and thrombocytopenia, 721
Tissues and humors of eye, blood clotting agents available in, 172
Tissue buffer-capacity in corneal alkali burns, role of, 711
Tissue differentiation, non-traumatization, correlations between histological structure and echogram as basis of, 1104
Tobacco amblyopia, absorption of vitamin B₁₂ in, 912

- Tomography, hypocycloidal, optic canal, 914
optic canal, 701
- TONOGRAPHY, and gonioscopic investigations of various age groups, comparative, 1115
- bilateral, 1116
- comparative investigations of influence of various mydriatics on, 183
- computer evaluation on, 183
- glaucoma provocative test with Mydriaticum-Roche and exposure to darkness with, 182
- mydriasis, during treatment with miotics, 922
- Tonometer calibration in West Germany, present state of, 703
- Tonometer, MacKay-Marg Electronic, in adults, appraisal of, 923
- recent procedures for calibrating indentation and appplanation, 703
- Tonometry, differential, and extraocular venous pressure, 924
- differential, and venous pressure, 1115
- indentation and appplanation, in rabbits, 922
- Tourist, ophthalmomyiasis in, 904
- Toxicity, drug, for anterior segment of eye, 910
- drug, for retina and optic nerve, early diagnosis of, 909
- retinal drug, some aspects of, 910
- Toxoplasmosis and endogenous uveitis, 1112
- Toxoplasmosis, ocular, 174
- ocular, in cats, 904
- Trabecular meshwork in absolute glaucoma, histological changes of, 716
- Trabecular meshwork increase resistance of aqueous outflow, can pigmentary deposits on? 529
- Trabecular system and neighboring tissues, connections of, 716
- Trabeculotomy, results and mode of action in, 1114
- TRACHOMA and endemic goiter, 333
- and keratoplasty in southwestern American Indian, 711
- campaign in USSR against, ways and means to consolidate results of, 335
- Kelfizine in treatment of, 175
- methyl green-pyronin stain for diagnosis of, 702
- Traction, acquired macular, problem of, 1117
- Training of patients with poor vision due to severe organic damages, 334
- Transcutaneous myectomy of inferior oblique muscle, comparison of scleral recession and, 706
- Transfoveal after-image as indicator of eccentric localization, 1108
- Transparencies, stereoscopic 35 mm, multistereoviewer for, 1104
- Transplants, corneal, experimental investigation of post-operative tensile strength of, 920
- early replacement of corneal, in failure of keratoplasty, 179
- Transplantation of corneal tissue in necrotizing nodular scleritis, 710
- Transportation, vertical, of horizontal rectus muscles for elimination of vertical strabismus, 1109
- Trans-scleral cryocoagulation, experimental, at variable temperatures, 1104
- TRAUMA (See also INJURIES):
- Trauma, indirect, as cause of retinal detachments, 188
- indirect, retinal artery occlusion and, 724
- Traumatic cysts of anterior chamber and their treatment, 181
- Traumatic dislocations of lens, prognosis in, 718
- Trephining, Elliot's scleral, 1115
- Trismus, dysphagia and miosis: Unusual presentation of temporal arteritis, 932
- Tritiated benzyl penicillin in rabbit eye, distribution of, 521
- Tritiated retinaldehyde by visual pigment of dark-adapted rats, uptake of, 900
- Tritiated tetracycline in rabbit eye, distribution of, 907
- Tropicamide, systemic reaction to, 1103
- Tuberculostatics, disturbances of accommodation in treatment with, 1103
- Tuberculostatic Myambutol, eye examinations during treatment with new, 175
- Tubingen perimeter, measurement of critical fusion frequency with, 701
- Tucking procedure, scleral, in retinal detachment, histological changes after, 928
- Tumoral exophthalmos by plexiform neurofibroma, 934
- TUMORS after irradiation therapy, five-year cure rate of malignant lid, 192
- benign, papillary, of non-pigmented epithelium of ciliary body (Fuchs' benign epithelioma), 180
- chorionic epithelial, of uterus, solitary choroidal metastasis as only clinical manifestation of, 939
- intraocular, diagnosis of, 1123
- new instrument for diagnosis of, 704
- malignant, of limbus, penetrating corneo-scleral grafts in two cases of, 179
- near globe, dangers to eyes by modern irradiation therapy of, 193
- optic nerve, surgical treatment of, 326
- orbital, value of exploratory orbitotomy for diagnosis and therapy of, 1121
- parapituitary and pituitary, value of radiation therapy for, 931
- parasellar, casuistic contribution to symptomatology of, 189
- pigmented, of limbus, investigations on morphology, course and treatment of, 939
- pituitary and parapituitary, value of radiation therapy for, 931
- pituitary, Cushing's syndrome; pathophysiology and ocular manifestations of ACTH-secreting pituitary adenomas, 327
- spinal cord, papilledema with, 327
- suspected intraocular, means of avoiding enucleation for, 329
- U
- $U^{14}C$ -glucose into vitreous polymers in vitro and in vivo, studies on incorporation of, 1116
- Ulcerations, corneal, collagenase in, 919
- ULCERS of alkali-burned cornea, prevention of, 919
- pseudomonas, in rabbit corneas, effect of contact lenses on, 903
- Ultrasonography in diagnosis of ocular affections, 1104
- Ultrasonography to examination of eye, application of, 703
- Ultrasonography, vitreous, 322
- ULTRASOUND attenuation in muscular and fat tissue, 521
- effects on permeability of eye tissues with tagged atoms, 172
- field, influence of coats of eye on, 702
- influence of lenses on, 762
- ocular damage due to, 1125
- Ultraviolet and solar radiation, 1125
- Unilateral endocrine exophthalmos, additional clinical sign of, 176
- Unit response photically evoked in albino rabbit lateral geniculate body, short latency, 900
- Universal complete albinism with nystagmus, chromosome study in, 168
- Urinary excretion, increased, of acidic mucopolysaccharides in exophthalmos, 942
- Urine, quantitative determination of acid mucopolysaccharides in, 517
- Uropathy, obstructive, bilateral retinal detachment accompanying renal insufficiency secondary to, 929
- Uterus, solitary choroidal metastasis as only clinical manifestation of chorionic epithelial tumor of, 939
- UVEA, 922
- circulation, continuous registration of, 915
- effusion as sign of myxoedema, 921
- malignancies, conservative management of, 1123
- melanoma, erroneous clinical diagnoses of retinoblastoma and, 330
- prognosis of malignant melanomas of, 732
- UVEITIS, anterior, incidence of, 1113
- clinical features and pathogenesis of discontinuous reversible arteriopathy in, 714
- diagnosis and treatment of, 1113
- double-blind therapeutic trial of isoniazid in 344 patients with, 913
- endogenous, 713
- experimental allergic, in guinea pig by immunization with homologous retina, 517

UVEITIS (continued)

- experimental, electron microscopy of, 1100
- experimental immunogenic, antibody formation by single cells during, 517
- hypertensive, 528
- in childhood, 528
- mycoplasmal anterior and posterior, and clinical manifestations of experimental disease, 921
- mycoplasmal anterior and posterior, and histopathologic manifestations of mycoplasmal uveitis, 921
- of undetermined etiology and parasitic appendicitis from *Taenia saginata*, 713
- peripheral, cyclophosphamide therapy of, 714
- tattoo granuloma and, 528

V

- Valsalva maneuver, ptosis and proptosis following, 937
- Vascular changes on aging, using PAM staining technique, electron microscopic study of human iris vessels with special reference to, 715
- Vascular changes, retinal, in untreated retinoblastoma, 939
- Vascular disturbances in ophthalmological practice, experiences with Coaldon in treatment of, 911
- Vascular findings in eye, interpretations of, 702
- Vascular lesions, cervical, evaluation of dynamometric data in, 706
- Vascular occlusions, acute, in ophthalmology, thrombolytic treatment of, 175
- Vascular pathology with PAM impregnation technique, electron microscopic study of conjunctival vessels, analysis of, 920
- Vascular processes of fundus, on meaning of erythrocyte lipoids in any, 723
- Vascularization, corneal, experimental investigations on effect of lacrimal fluid of rabbits and humans on development of, 920
- Vasoconstrictors in cataract surgery, evaluation of various, 718
- Venography, orbital and cavernous sinus, new method of, 703
- Venous pressure, differential tonometry and, 1115
- episcleral, in pulmonary hypertension. Contribution to problem of "cardiogenic" glaucoma, 718
- extraocular, differential tonometry and, 924
- extraocular, new method to determine, 703
- Venous pulse, spontaneous, model experiments on significance of, 1098
- Venous system, retinal, and optic nerve, side effects of oculation inhibitors on, 909
- Venous thrombosis, peripheral, and thrombocytopenia, retinal vein thrombosis with, 721
- Vermis, cerebellar, familial agenesis of; syndrome of episodic hyperpnea, abnormal eye movements, ataxia and retardation, 515
- Vertebral artery, transitory blindness after angiography of, 930
- Vertebrate retinas, atypical mitochondria in ellipsoid of photoreceptor cells of, 168
- Vertical ocular deviations, treatment of, by prismatic overcorrection, 176
- Verticillata, cornea, 1112
- Vertigo, flicker-induced, painted helicopter main rotor blades and, 1125
- Vesicular stomatitis virus (VSV) infection in rabbit eye: Role of antibody and interferon, 1101
- Vessels, leaking, of eye, electron microscopic studies of, 902
- Vestibular diagnosis, differential caloric stimulations in, 328
- Vestibular studies in case of congenital nystagmus, 1120
- Viral growth patterns in iris organ culture system, 1101
- Virostatic and non-specific therapy of keratitis dendritica with combination of IDU para-fluorophenylalanine, efficiency of, 709
- Virus infection, neonatal herpes simplex, ocular involvement in, 904
- Virus (VSV), vesicular stomatitis, infection in rabbit eye and role of antibody and interferon, 1101
- Viscosity of rabbit sclera and cornea following cryotherapy, 709
- VISION, binocular, new anatomic physiologic and psychologic factors of, 515
- binocular single, diplopia field and area of, 1108
- hearing, and communication in babies and young children, development of, 519
- poor, ERG, and VER studies of children with, 702
- prescriptions, low, guideline in, 906
- rapid loss of, which is initial manifestation of bronchogenic carcinoma, 941
- spontaneous improvement of, problem of therapeutic successes and, 1119
- text, exact, for children, 703
- stereoscopic, review of, 1107
- young children's, 906
- VISUAL, acuity, by induction of optokinetic nystagmus, objective assessment of, 1102
- following prolonged driving, alteration in, 1126
- of moving objects. 2. Horizontal and circular movements of test objects have been compared, 906
- on time series analysis of; statistical model, 518
- peripheral, in normal and amblyopic subject, contribution to study of, 1108
- retinal, in cataract cases, 185
- beats: Differential brightness of stimuli and estimation of brightness, 172
- behavior of monkeys, effects of radical disconnection of occipital and temporal cortex on, 727
- capacity, 519
- cortex ablation, acetylcholine in rabbit visual system nuclei after enucleation and, 900
- cortex following excitation of peripheral retinal rods, responses of human, 900
- deprivation on perceptual behavior, effect of, 931
- deprivation on receptive field shape determined neurophysiologically, selective effect of, 930
- electrical responses, effect of intraocular pressure on, 902
- evoked occipitogram in strabismic amblyopia under direct-view ophthalmoscopy, 525
- evoked response and ERG studies of children with poor vision, 702
- evoked response by optic tract stimulation before and after enucleation, reticular facilitation of, 931
- evoked response in brain injured monkey, 327
- evoked response in man, relation between localized retinal stimuli and, 1100
- fatigue, 900
- form agnosia, 190
- function, correlation between appearance of optic cup and, 726
- mechanism in learning disorders, 1106
- mechanism sensitive to orientation and direction of motion, contrast response of human, 172
- motion perception: experimental modification, 931
- organ, observations on effect of ovulation inhibitors on, 908
- pathway of rabbit, fastest conduction system in, 898
- pathways, organization of, 327
- perception beyond atmosphere, 1125
- physiology, optics and, 906
- pigments, lipid to protein chromophore transfer in photolysis of, 900
- pigment of dark-adapted rats, uptake of tritiated retinaldehyde by, 900
- prognosis after solar retinopathy, 1118
- recognition, perceptual and associative disorders of; relationship to side of cerebral lesion, 326
- sensitivity, spectral, with electro-retinographic results in dog, concept of, 901
- spatial agnosia, right-sided unilateral, asomatognosia and with left hemisphere lesions, 727
- system nuclei, rabbit, after enucleation and visual cortex ablation, acetylcholine in, 900
- test device for children, experiences with Rodenstock R 5 905
- Visually handicapped child, 930
- Vital staining of detached retina with retinal breaks, 928
- Vitamin A deficiency by new quantitative technique, measurement of dark adaptation in, 515
- Vitamin B₁₂ in tobacco amblyopia, absorption of, 912

- Vitelliform disk, precocious macular heredo-degeneration Best's disease and, 514
- Vitiligo, unilateral sectoral pigmentary degeneration and, 722
- Vitreo-retinal surgery, stereoscopic microscope for, 703
- VITREOUS and its role in pathogenesis of retinal detachment, biomicroscopy of, 719
- and retina, toxic action of hemoglobin on, 323
- anterior limiting membrane of, in aphakic eye, pseudoxfoliative deposits on, 1117
- antigenic mosaic of, and its surrounding tissues; experimental study, 323
- biology and surgery of, 531
- body artery, persistent, rare case of, 187
- body changes in iridocyclitides, clinical significance of, 529
- body, human fetal, development of, 324
- body in relation to embryonal blood vessels and vitreous cortex-cells, structures of, 720
- body of single eyes, determination of amino acids in aqueous humor and, 899
- cellular elements of, 926
- choroid, and retina, rabbit, following retrobulbar injection, penetration of steroids into 912
- cortex-cells, structures of vitreous body in relation to embryonal blood vessels and, 720
- structure of zonula in relation to embryonic blood vessels and to, 925
- excision, cryofixation with, 925
- hemorrhage in newborn, 323
- in hopeless cases of retinal detachment, silicon injection into, 325
- in normal rabbit, basic protein of, 896
- lyophilized, and hyaluronic acid for vitreous surgery, 323
- of normal human eyes and of eyes with malignant melanoma of choroid, sialic acid in aqueous humor and, 1099
- persistent hyperplastic primary, intraocular adipose tissue and, 925
- polymers in vitro and in vivo, studies on incorporation of U-¹⁴C-glucose into, 1116
- replacement and immunology, 323
- replacement by autopsy-vitreous, 323
- surface after photocoagulation, cellular proliferation on, 926
- surgery and indications for intravitreal injections, difficulties of, 322
- surgery, lyophilized vitreous and hyaluronic acid for, 323
- ultrasonography of, 322
- volume, effect of osmotic substances on, 530
- Volume, ocular, and common carotid occlusion in rabbit, 516
- Volume of vitreous, effect of osmotic substances on, 530
- V pattern exotropia, surgery of inferior oblique muscles in, 917

W-X-Y-Z

- Waaerdenburg's syndrome with blind lacrimal fistula, 169
- Water-loading test in rabbits, 922
- Wavelength and luminous energy, physiologic variations of human ERG as function of, 171
- Waves, cortical, associated with eye movement in cat, localization and characteristics of, 900
- Weakening surgical interventions, symmetrical, at internal rectus muscles, indication and dosage in, 1109
- Wencke's encephalopathy, convergence spasm associated with, 326
- Wetting time, corneal, desiccation of precorneal film and, 1112
- Whipple's disease and papilledema, 331
- Wilson's disease, "sunflower cataract" in, 332
- Wiskott-Aldrich syndrome, ophthalmic manifestations of, 1097
- Wound closure, effect of, after cataract extraction on changes in chamber angle, 185
- Wound healing, corneal influence of topical and oral zinc upon, 919
- limbal, after cataract extraction, 926
- Xanthelasma, ultrastructure of, 938
- Xanthofibroma of orbit, 1121
- Xanthogranuloma, juvenile, of ciliary body in adult, 940
- Xanthomatosis around eye, 936
- Xerophthalmia, total, management of, 938
- Xerosis, surgical treatment of, 191
- Xg, ocular albinism and, 895
- X-ray cataract, distribution of protein within lenses with, 187
- X-ray in comparison with results obtained with fast neutrons, electron microscopic study of rabbit ciliary body irradiated with, 901
- X-ray therapy for inflammatory ocular disease of anterior segment, experiences with, 702
- "Y" type operations in squint, 177
- Z-blepharoplasty, 1122
- Zeiss-Oberkochen photocoagulator and some improvements of Siemens Ruby laser coagulator, photocoagulation through Goldmann contact glass and second model of attachment to, 1105
- Zinc, topical and oral, upon corneal wound healing, influence of, 919
- Zonula in relation to embryonic blood vessels and to "vitreous cortex cells," structure of, 925
- Zonula (morphological basis for new theory of accommodation), architecture and function of human, 895
- Zoster, traumatic ophthalmic, 332

SUBJECT INDEX

VOLUME 70, JULY-DECEMBER, 1970

ORIGINAL ARTICLES, AND NOTES, CASES, INSTRUMENTS

Note: Abstract Index follows Author Index

A

- Accommodative convergence/accommodative ratio in families with and without esotropia, gradient, 558
 Adenocarcinoma of glands of Moll, case report of, 984
 Adhesive, isobutyl cyanoacrylate, removal of, from cornea with acetone, 725
 ANGIOGRAPHY, FLUORESCIN, film strip adaptor for projection of, 291
 in experimental ocular hypertension, 351
 melanoma, nonfluorescent, 748
 pseudofluorescence, a problem in interpretation of, 1
 Anophthalmia, multiple anomalies, and unusual karyotype, 381
 Anterior chamber cleavage syndrome, corneal transplantation in, 942
 A-pattern horizontal deviations, complications following bilateral superior oblique weakening surgical procedures for, 583

B

- Basal cell carcinoma of the eyelids, reappraisal of, 329
 Bick procedure, repair of ectropion using, 233
 Binocular indirect ophthalmoscope, portable transformer for, 430
 Biopsy, conjunctival, for histochemical diagnosis of cystinosis, 278
 Blindness, etiology of, in Nigerian children, 533
 Boeck's sarcoid, case of dacryocystitis secondary to, 1011

ABSTRACT INDEX

A

- A and V syndrome, 464
 Accommodation, human ocular, at different ages, impedance cyclography in, 160
 Adenohypophysis in chickens, influence of conditions of illumination on weight and acid-phosphatase activity of, 457
 Adhesives, clinical applications of, in corneal surgery, 879
 for sutureless muscle surgery, 877
 ocular, new uses for, 876
 surgical, double-plate corneal prostheses fixed with, 164
 Adrenergic innervation of iris, ciliary body, and ciliary processes of rabbit eye, 452
 Aging human lens capsule, accumulation of fibrillar protein in, 662
 Agraphia, alexia without, 667
 Albinism, congenital miosis and, 867
 Alexia, without agraphia, 667
 Allergies, ocular contact, clarification and treatment of, 673
 Alveolitis, diffuse fibrosing, 1045
 AMBLYOPIA ex anopsia, evolution and treatment of, 163
 acuity measured with easy and difficult optotypes of, 318
 functional, and minimal papillary malformations, 163
 functional, physiopathology of, 163
 hysterical, visual evoked response in, 174
 in private practice, 163
 or the lazy eye, 877
 strabismic, dominance and, 163
 frequency of, 465
 results of treatment of, 164
 statistical results of treatment of, 163
 Aneurysm, intracranial, secondary to mycotic orbital and sinus infection, 669
 of anterior communicating artery, blindness due to, 1041
 ANGIOGRAPHY, cerebral, visual field defects following, 1042
 coronary, transient cortical blindness following, 667
 fluorescein, in juvenile macular degeneration, 476
 in papilledema and pseudopapilledema, 1038
 is diagnosis of macular degeneration possible by, 1040
 of vessels of iris, 168
 in papilledema, 1042
 in vitelliform macula, 173
 practical aspects of, 463
 retinal, and macular degeneration, 1040
 studies, 460, 876
 Anophthalmos, anatomical and clinical considerations in, 455
 ANTERIOR CHAMBER acrylic implants, 663
 development of angle of, 867
 epithelialization of, after cataract extraction, 663
 flat, surgical restoration of, 169
 implants, Choyce Mk I and Mk VIII, long-term tolerance of, 475
 influence of biometric alteration of lens on depth of, 1037
 measurements on CO₂ laser corneal irradiation, 868
 non-metallic foreign bodies in, 179
 of the normal eye and its constituent factors, depth of, 864
 synchysis scintillans of, 1034
 Anterior cleavage syndrome associated with Weill-Marchesani syndrome and craniofacial dysostosis, 314
 Anterior corneal mosaic, 165
 lens displacement with age, 1035
 APHAKIA, hypertension, diathermy-cyclodialysis in, 471
 infants, visual rehabilitation of, with contact lenses, 318
 unilateral, color perception in, 474
 Aplanation apparatus, hand-held, trial results of, 162
 AQUEOUS HUMOR, antistaphylococcal agglutination titers in, 457

AQUEOUS HUMOR (continued)

- normal, proteins of, 870
 ocular therapeutics based upon, 1036
 passage of pyrrolidinomethyltetracycline (PMT) into, 459
 transaminase level of, in patients with intraocular malignant neoplasms, 177
 vitamin B₁₂ and intramuscular cobalamins, 161
 Arachnoid cyst of quadrigeminal plate, 669
 Archives of Ophthalmology, 183
 Arteritis, temporal, smooth muscle cell involvement, 178
 Aspergillosis, ocular, 871
 Autosomal chromosome aberrations in ophthalmology, 455

B

- Bedsonia isolated from patient with Reiter's syndrome, 871
 Bell's palsy and Bell's phenomenon, 174
 Beta therapy of pterygium with ⁹⁰Sr, 1030
 Bielschowsky head-tilt test, 464
 Binocular fusion, and human visual evoked response, 878
 BLINDNESS, changes in etiology of, among school children in central Illinois, 1046
 congenital, observations on, 866
 methanol, 874
 nasopharyngeal syphilis with, 317
 of children, homocystinuria as possible cause of, 866
 of children in Tunisia, 1046
 of infancy, 866
 reactions to, 674
 transient cortical, complication of coronary angiography, 667
 Blinking, electro-oculography of, 456
 hydrodynamics of, 176
 Blood-retinal and blood-aqueous barriers, electron microscopic studies on, 452
 BRUCH'S MEMBRANE and its connection with choroid capillaris, 451
 fine structure of, 452

C

- Caffey's syndrome, 313
 Canal of Schlemm, external fistulization of, 661
 surgical measures on, 661
 Carotico-cavernous fistulas, 1041
 "Cat eye" syndrome with normal chromosomes, 865
 CATARACT and corneal graft, combined operation of, 879
 and glaucoma, combined operations for, 169
 atopic, 473
 congenital, management of, 662
 experimental, light scattering in lenses with, 169
 extraction, absorbable suture for, 663
 bilateral, in one sitting, 169
 following retinal detachment surgery, 1037
 early postoperative ocular hypertension following, 661
 effect on cornea, 659
 epithelialization of anterior chamber after, 663
 formation, influence of various miotics on, 161
 galactose, dulcitol and water concentrations in hamsters, 662
 incidence of phthisis bulbi as complication of, in congenital rubella syndrome, 662
 in the dog, 864
 late complications of, after cryoextraction, 170
 of dysplasia epiphysealis punctata, 1036
 radiation, after treatment with thorium-X, 474
 repair of filtering blebs following, 1037
 trematode, in fresh-water fish, 864
 Cataractogenic effect of dibromomannitol in rats, 874
 Chalazion spur, 876
 Chandler's operation for malignant glaucoma, 660
 Chloride ion transport in isolated ciliary body, 158, 159
 Chlorpromazine therapy, ocular complications of, 874
 Cholesteatoma, supracellar, 174

- Cholinesterase activity in ultrastructural of, 456
 inhibitor treatment, chronic, effects of, 458
 Chondrodystrophy, congenital, 315
CHORIOCAPILLARIS and retinal capillaries, ultrastructure, 452
 Bruch's membrane and its connection with, 451
 Chorioretinal changes associated with hyperlipidemia, 1040
 degeneration, hereditary, and metabolic disturbances, 455
 Chorioretinitis, post-traumatic, Hutchinson-Siegrist type, 167
 Chorioretinography, central serous, and photocoagulation, 1040
CHOROID alterations, triangular forms of, 1039
 blood supply, treatment of disturbances of, 461
 detachment in aphakic uveitis, 166
 malignant melanoma of, in case of nevus of Ota, 1044
 melanoma, dynamic tonometry and, 178
 interdependence of cutaneous nevus and conjunctival nevus and, 177
 melanomata, 1044
 metastases, management of, from breast carcinoma, 177
 nevi, clinical study of, 1034
 nodules and retinal detachment in rheumatoid arthritis, 673
 Choroideremia (progressive chorioretinal degeneration), 455
CILIARY BODY, in glaucoma, experiences with cryoapplication to, 471
 intraocular pressure without, 473
 isolated, chloride ion transport in, 158, 159
 Ciliary ganglion, blood supply of, in rhesus monkey, 451
 muscle tonus during sleep, 158
 processes of rabbits, histologic localization of ascorbic acid in, 871
 Cogan's syndrome, 179, 665
 Collagen disease, retinal detachment in, 1039
 Collagenosis, scleromalacia perforans and, 1030

 fluid and mucous thread, dead, degenerate, and living cells in, 165
 hemorrhagic lymphangiectasia of, 1031
 nevus, 177
 rhinosporidium granuloma of, 466
CONJUNCTIVITIS, acute follicular, 318
 ligneous, 469
 neonatal inclusion, in Australia, 165
CONTACT LENSES, changes in corneal reflex in patients wearing, 465
 hydrophilic, use of, to increase ocular penetration of topical drugs, 873
 perilimbal, 1030
 trial, contamination of, 458
 variation of visual acuity with, 318
 visual rehabilitation of aphakic infants with, 318
 Contusion, eye, 180
 Convergence, accommodative, 878
CORNEA, adhesives in surgery of, 879
 calcification in spontaneously diabetic mice, 468
 degenerations, congenital, and lesions produced by tear gas, clinical features and histology of, 467
 diffuse, Waldenström's macroglobulinemia, 1032
 hereditary crystalline, clinical, genetic and histologic study, 1032
 donor, clinical test for evaluating, 1031
 dystrophy, congenital, 164, 469
 familial, 465
 hereditary epithelial, extent of variation of Meesman-Wilke type, 467
 keratoplasty in (Groenow type), 469
 Reis-Bucklers', 659
 edema and keratoplasty, electronic applanation tonometry in, 164
CORNEA (continued)
 effect of cataract surgery on, 659
 electron microscopic study on, 468
 endothelial lesions of, in rabbits, produced by herpes simplex virus, 465
 endothelium, damage to, with cryoapplication, 457
 fine structure, experimental uveitis, 659
 fine structure, graft rejection, 659
